

How to Draw Little Bunny by Steve Smallman

1. Start with basic head and body shape. Pressing lightly with a soft pencil. Guidelines for eyes and centre of face.

2. Add eyes and curved line underneath them.

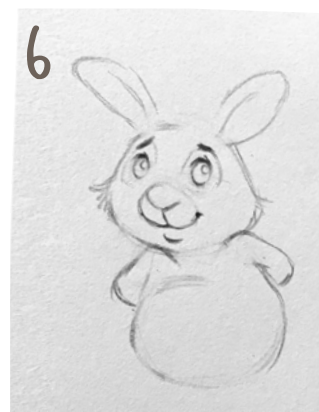

3. Add nose and 'muzzle'.

4. Add ears, outline lighter patch around eyes. Draw small circles in eyes for highlights. Add a little, wonky smile and a line under the nose.

5. Add shoulders and arms tucked behind back. Define eyes and eyebrows.

6. Clean up using a putty rubber.

7. Decide on a light source and add shading to the opposite site.

8. Smudge with finger to soften the shading.

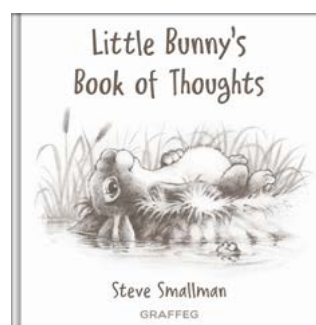

9. Fill in the eyes leaving white highlights.

10. To make bunny look even more shy, lower the eyelids and change eyebrow shape slightly.

Close-up. *Will you be my friend?*
