

Make sure your Console is on & your battery has been removed from your Controller before you start

SETUP

STEP 1

Carefully connect the Eliminator to your controller. Make sure the tab is lined up correctly and press down on the top of the Eliminator until connected. The Eliminator device should be flush with your controller.

STEP 2

Once attached, carefully connect the USB connector to the USB port at the top of the controller.

STEP 3

Connect the supplied USB cable to your Eliminator.

STEP 4

Connect this cable to your Console's USB port.

Once connected the eyes on your Eliminator will glow White to indicate that you are in Tournament mode.

ACTION BUTTON MAPPING

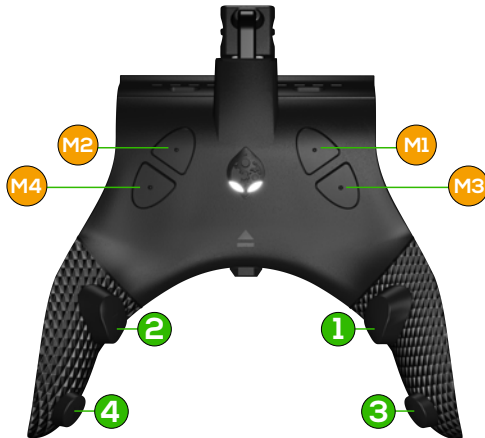

STEP 1

Hold **M1** to map to Button **1**

Hold **M2** to map to Button **2**

Hold **M3** to map to Button **3**

Hold **M4** to map to Button **4**

STEP 2

While still holding your chosen mapping button, briefly press the button you wish to map to that Action Button. Afterwards release the mapping button. You have now mapped your chosen controller button to the corresponding Action Button on the Eliminator.

Example:

If you hold **M1** (while still held) you briefly press the **B** button on your controller, then stop holding the **M1** **B** will now be mapped to Button **1**
