TruFlora®

Cleansing probiotic for
digestive and immune health*.

WORKS BEST FOR*:

- ▶ Occasional constipation and diarrhea
- ▶ Supporting the immune system
- ▶ Probiotic cleansing
- ▶ Occasional Gas and Bloating
- ▶ Proper nutrient absorption

CLEANSE

Cleanse your G.I. tract and support your immune system with a powerful combination of probiotics and enzymes.*

TruFlora® contains three powerful probiotic strains that colonize primarily in the small intestine where they help purge undesirable, non-pathogenic bacteria, yeast, and waste. TruFlora also contains two enzymes that work synergistically with the probiotics. This combination provides a prevailing, multi-faceted attack. The enzymes hinder and breakdown beta glucans that comprise yeast cell walls. The probiotics produce large amounts of beneficial lactic acid that provides a bio-cleansing action.*

The probiotic strains in TruFlora® are backed with years of efficacy and we protect them through the acidic stomach with a natural carbohydrate derived from seaweed. Upon arrival in the G.I. tract, **our patented prebiotic, Lactostim®** rehydrates and stimulates the probiotics improving their effectiveness.

Choosing effective strains, delivering them alive and stimulating their growth are the keys to a quality probiotic. We are so confident that you will feel a difference by using our products that **we offer a 60 day, 100% money back guarantee.**

What's inside TruFlora?

THREE PROBIOTIC STRAINS:

- *Bacillus coagulans (Lactobacillus sporogenes)* – 2 billion CFU (Strain IS-2)
- *Lactobacillus plantarum* – 10 billion CFU (Strain LP-115)
- *Lactobacillus salivarius* – 3 billion CFU (Strain LS-33)

TWO DIGESTIVE ENZYMES:

- **Beta-Glucanase** – 146 mg
- **Hemicellulase** – 27 mg

OTHER INGREDIENTS:

- **Sodium Alginate** – Provides protection from stomach acid and is a probiotic-preferred source of prebiotic fiber (Protected by 2 US patents).
- **LactoStim** (Sunflower Lecithin and Oleic Acid) – Our patented prebiotic. LactoStim stimulates probiotic growth as soon as they arrive in your digestive tract. (Protected by 5 US patents).
- **Ascorbic Acid** (Vitamin C) – Antioxidant.
- **Microcrystalline Cellulose** – A food-grade plant fiber used to standardize the probiotic strength.
- **HPMC** (hydroxypropyl methylcellulose) – A derivative of plant cellulose which comprises the capsules.
- **Trisodium Phosphate** – Food grade buffer that assures proper pH control.
- **Magnesium Stearate** – Ensures a uniform mixture of all ingredients. A pharmaceutical grade, vegetable source is used in TruFlora.
- **Silicon Dioxide** – Reduces moisture and improves shelf life. Silicon dioxide, or silica for short, is a micronutrient in human nutrition.
- **Calcium Silicate** – Anti-caking agent.
- **Maltodextrin and Tapioca Dextrin** – enzyme carriers.

ALLERGY STATEMENT

- **TruFlora contains no:** milk, eggs, gluten, wheat, soy, casein, nuts, seafood, or beef products.

Dosing

Master Supplements offers simple yet effective dosing options. Standard dosing is for mild symptoms or as an initial loading dose. Health Maintenance programs are economical and provide digestive support for healthy individuals. Intensive and Doctor Supervised programs are available for more additional digestive support.

Standard Program:

- ✓ Take one capsule daily
- ✓ 32 capsules last 32 days

Health Maintenance Program:

- ✓ Take two capsules per week
- ✓ 32 capsules last 16 weeks

Intensive Program:

- ✓ Take two capsules daily
- ✓ 32 capsules last 16 days

Doctor Supervised Programs: For some instances, higher doses of probiotics may be beneficial. For these higher doses, we suggest consultation with a Healthcare Provider.

OTHER IMPORTANT DOSING NOTES

- When taking TruFlora with antibiotics, allow two hours of separation.
- TruFlora can be taken with or without food.
- What time of day you take TruFlora® depends on your preference.
- For those who have difficulty swallowing capsules, a TruFlora capsule can be opened and mixed into soft food.

Probiotic Rotation

Certain probiotic strains colonize different regions of the G.I. tract and affect the body in different ways. After using TruFlora, there may be instances where it is beneficial to rotate with Theralac® or TruBifido®. We recommend weekly rotation so it is easy to monitor how the body reacts to the varying probiotic actions. Please contact us for specific dosing recommendations and more details on probiotic rotation.

Scientific References

Master Supplements uses high quality probiotic strains that are backed with science and a history of efficacy. Since not all strains are created equal, we list individual potencies for each strain and provide DNA verification upon request.

Quality Assurance

Master Supplements posts third-party test results online for every lot of TruFlora we produce. We show the purity, potency, activity and identity, because we want you to see for yourself how we continually raise the standard.

Totally Inert Packaging

During the manufacturing process we utilize Totally Inert Packaging including amber glass bottles instead of plastic, rayon wadding over less effective cotton, a nitrogen flush to remove excess oxygen and both moisture and oxygen absorption packets. TruFlora's potency is guaranteed through expiration, when kept refrigerated.

Key Digestive Support

Diet and Nutrition: Certain people are able to digest fats, carbohydrates, proteins and fiber better than others. It is important to pay attention to your body and understand how you react to certain foods. In general, we suggest a whole food diet with a plant-based emphasis. This diet should be low in sugar, fat, and artificial ingredients. To get the best digestive results, your diet should complement your digestive supplementation.

Hydration: Water is vital for all the systems of the body to operate effectively and it is especially important for proper digestive function. Often times, deficient digestive motility and constipation can be helped with increased water consumption.

Lifestyle Factors: Even if you are eating properly, staying hydrated and are physically active, you may still be susceptible to digestive imbalance. Stress, anxiety, alcohol, antibiotics, medications, nicotine, and environmental pollutants are a few factors that can affect proper digestive and immune function.

Other Supplementation: To support probiotic action we recommend the digestive enzyme Enzylase® and the soluble fiber TruFiber®. For a gentle colon cleanse, take Enzylase and TruFiber together at nighttime for 10 consecutive nights. This gently cleanses the G.I. tract and helps prepare it for optimal probiotic colonization.
