FEATURES & BENEFITS

CONSTRUCTION
1-1/4” IPS Schedule 40 hot-dipped galvanized steel pipe and fittings along with powder-coated cast-iron 9” (22.9 cm) diameter floor flange provide corrosion resistance in a long lasting product.

QUALITY CONTROL
Eye/face wash and valve assembly are pre-built and fully water/pressure tested to ensure no leaks and proper function which ultimately reduces installation time.

VALVES
Eyewash and shower ball valves are designed to make the flushing of contaminants occur with the simple pull of a lever or push of a stainless steel flag. Both valves come equipped with stainless steel ball and stem to provide greater protection against corrosion and breakage.

STRainers/FilterS
Chrome-plated brass in-line 50 x 50 mesh water strainer prevents debris from reaching the eyewash so the unit stays functioning at its best. Strainer is easily serviceable.

SHOWER HEAD
AXION® MSR ABS plastic drench showerhead uses a hydrodynamic design to give equal distribution of water throughout the entire footprint of flow.

Eye/Face Wash
AXION® MSR eye/face wash head (patent pending) uses an inverted directional laminar flow to sweep contaminants away from the vulnerable nasal cavity.
