FIRE FIGHTING EQUIPMENT

2023 Catalog

SCOTT™
Fire & Safety

Authorized Distributor

3M™ Scott™ Air-Pak™ X3 Pro SCBA

5.5 Cylinder Technology minimizes weight and profile, helping to reduce user fatigue, improve productivity, and decrease injuries

Proudly **“Made in the USA”** with attention to quality and workmanship

Meets the latest **NFPA 1981/1982, 2018 Edition** standards

“Buddy” Lights enable a 360° view of the firefighter’s air pressure and PASS status

Snap-Change cylinder connection provides rapid cylinder replacement and improves cylinder charging efficiencies

As Long As You Own It Warranty provides peace of mind knowing that your most important investment is backed for your lifetime ownership of the SCBA

Easy-to-Remove Harness allows for cleaning and decontamination to help with exposure reduction

Central Power Source improves battery management to minimize cost of ownership

Universal EBSS provides compatibility between SCBA for “Buddy Breathing”

Redundant Safety Features afford firefighters peace of mind knowing that the SCBA will perform in the toughest environments

RFID-Enabled Bumper tracks cylinder fill history and monitors DOT compliance (i.e. hydrostatic testing)

3M™ Scott™ Universal Emergency Breathing Safety System (UEBSS)

- New standardized fittings (Rectus type) for all manufacturers

order online @ www.seawestern.com

Integrated Drag Rescue Loop provides a horizontal pull strength of 1000 lbs to assist with rescuing a downed firefighter

New Harness Materials offer greater resistance to chemical exposure and less water absorption to help minimize contamination

Electronic PAR (ePAR) provides wireless communication between the firefighter and incident command (using Monitor Pro telemetry software) to improve fireground accountability and communications

"Buddy" Lights enable a 360° view of the firefighter's air pressure and PASS status

Aluminum Alloy Backframe offers a lightweight, durable design to withstand the rigors of the fireground.

Proven Regulator Design offers low breathing resistance to help reduce user burden and improve operational efficiencies

New Buckle Design provides firm hold to prevent inadvertent loosening of shoulder and waist straps to help provide a secure fit of SCBA on the firefighter.

3M™ Scotchlite™ Reflective Material enhances visibility of the SCBA when operating in low light conditions, improving safety and accountability on the fireground

Naturally Articulating Waist Pad promotes greater range of motion to the firefighter, while transferring weight to the hips for a more balanced load.

3M™ Scott™ EZ-Scape Pro Integrated Self-Rescue Belt

The EZ-Scape Pro is lighter, quicker-to-deploy, and is offered as a one-size-fits-most solution seamlessly integrated with the 3M Scott Air-Pak X3 Pro, Air-Pak X3, or Air-Pak 75 SCBA.

1-800-327-5312

SCOTT™
Fire & Safety

Authorized Distributor

PPE Interface

Face seal provides wider landing area with ridges to help improve interface with protective hood

Wider Field of View

Helps to improve situational awareness

Single Reflex Face Seal

Designed for enhanced comfort and easier donning

Removable Head Harness

Helps provide secure fit while minimizing adjustment during donning and is easily removable for cleaning

Modular Design

Enables future upgradeability, improves serviceability and provides a platform for use across multiple respiratory applications

Dual Voicemitters

Enhanced voice transmission - exceeds STI requirements for NFPA 1981

3M™ Scott™ Vision C5 Facepiece with E-Z Flo C5 Regulator

Designed using a platform approach, incorporates the latest technology to enhance situational intelligence while providing a customizable solution to meet the changing needs of today's firefighter.

3M™ Scott™ E-Z Flo C5 Regulator

Quarter-Turn Design provides secure connection to the facepiece. Vibralert End-of-Service Time Indicator (EOSTI) - Audible and tactile low air warning for immediate recognition on the fireground. Air Spray Bar - Provides separate inhalation air path and helps to reduce fogging during use. New features include: Enhanced Breathability, Enhanced Communications, Auto Air Saver, External Buddy Lights, Recessed Heads-Up Display and Expanded Heads-Up Display.

SCOTT™
Fire & Safety

Authorized Distributor

4.5 Carbon Cylinder - 45 Minute

5.5 Carbon Cylinder - 45 Minute

Options:

Cylinder End Caps

Protective end caps are offered for 4500 psi carbon cylinders and will accommodate 30' and 45' rated durations

Custom Logo I.D. Bands

Scott Safety offers its customers the ability to customize their new carbon cylinders by adding a personalized logo. This custom logo is printed on white paper, and protected by the fiberglass wrap and epoxy resin.

Cylinder Sleeves

Protective sleeves are offered for 2216 psi, 4500 psi, and 5500 psi carbon cylinders and will accommodate multiple cylinder sizes, to include 30', 45', and 60' rated durations.

30-Year Life Cylinders

30-Year Life Cylinders are available and built to DOT specifications with a 4500 psig working pressure. Lightweight, composite cylinder consisting of an aluminum alloy inner shell with a total overwrap of carbon fiber, fiberglass and an epoxy resin.

3M™ Scott™ RIT-Pak Fast Attack Emergency Air Supply System

Scott's RIT-Pak Fast Attack offers a small, lightweight, and compact solution for rapid entry and air replenishment to a firefighter in distress. Developed with input from firefighters and RIT instructors across the country, the RIT-Pak Fast Attack provides an intuitive design enabling RIT teams to focus on locating and assessing the downed firefighter.

Solo Rescue Decon Washer

Easy Decon of SCBA, Helmets, Facepieces, Boots, Gloves and Tools. Decon For Heroes.

The unique Solo Rescue system features a rotating basket that enables the water jets to reach even the most inaccessible parts of your equipment. The Solo Rescue offers the easiest, quickest and safest way of cleaning contaminated SCBA's, facepieces, helmets, boots and gloves.

You can choose between a 3 min cycle for gloves and boots or an 8 min cycle for SCBA's, facepieces and helmets.

- Optimized cleaning process
- Cleaning contaminated gear by hand is a health risk
- Minimize exposure & risk of recontamination
- Clean gear in less than 10 minutes

Heavy duty basket with holder for SCBA cylinders and one gear holder for Facepieces, Helmets, Gloves or Boots.

**Other basket configurations available.*

SCBA FLOW TESTING & SERVICE MOBILE & IN-HOUSE

3M

SCOTT™
Fire & Safety

Authorized Service Center

In-House 3M™ Scott™ - Certified Repair Center

We offer fast turnaround on the repair of 3M™ Scott™ SCBA's, Flow Testing and Hydrostatic Testing. Our DOT Approved Hydrostatic test facility is certified to test all SCBA cylinders.

Mobile 3M™ Scott™ - Certified Flow Testing

We have a full-time 3M™ Scott™ - Certified Mobile Technician available for annual Flow Testing at your location. You supply the SCBA's and Air, and we will get the job done.

Fit Testing

We offer Fit Testing with the TSI PORTACOUNT Pro+ Respirator Fit Tester, with built-in N95 technology to perform Quantitative Fit Tests.

order online @ www.seawestern.com

COMPRESSOR SERVICE ON LOCATION

BAUER
COMPRESSORS

Mobile Compressor Service

We offer routine maintenance on your compressor to increase the longevity of your breathing air system, including changing the oil, filters and cartridges. Our Factory-Certified Mobile Technician is available to get the task done.

Quarterly Air Test Program

Join our tried and true Quarterly Air Test Kit program to assist your department with meeting the NFPA 1500 standard. Every quarter, an Air Test Kit is automatically shipped to your department. You simply fill the empty container, seal the package, and mail. An air quality certificate will be mailed back to you.

UNICUS 4 All-In-One High Pressure Breathing Air System

A modern upgrade with the simplicity of analog controls; Aesthetically pleasing yet robust design found only in the UNICUS 4 All-In-One platform. The system is available in either 6000 or 7000 psig with discharge capacities ranging from 13 scfm charge rate to 26 scfm charge rate.

order online @ www.seawestern.com

Features:

STANDARD SCOPE OF SUPPLY

- BAUER breathing air purification system with SECURUS
- BAUER PLC based controller with 7" color HMI touchscreen display
- NEMA 4 rated electrical enclosure with UL listed control panel
- Compressor low oil pressure and high temperature safety shutdowns
- Emergency stop push button
- Hinged cascade fill control panel with Lexan laminate air flow/fill schematic
- Audible alarm on safety shutdowns
- Inlet filter maintenance indicator
- Automatic condensate drain system with non-corrosive condensate reservoir and integrated float sensor and automatic "Full" indication and compressor shutdown
- Two (2) ASME code stamped air cylinders installed in an integral rack designed to hold four cylinders
- Sound attenuating enclosure with slam-action latches and lift-off type hinges
- NFPA 1901 2016 edition compliant 3 position containment fill station accommodates SCBA or SCUBA cylinders up to 31" overall length

1-800-327-5312

VERTECON Compressor Systems

BAUER's VERTECON series of high pressure breathing air compressor systems have been an industry leader for many years. An economical design featuring the latest BAUER technological enhancements and unsurpassed maintenance accessibility are incorporated within the simplistic platform. The series now features an integral base which eliminates the guess work of product placement, insuring the system has been installed correctly for system ventilation and maintenance accessibility. With the advent of the integral base the compressor package also has the ability of having a sound attenuated enclosure optionally installed at a later date. A refreshed HMI operations panel and electrical control system allow you to tailor the system to your specific requirements.

**Available in
7000 PSI
Output**

Containment Fill Stations CFS5.5-3S/CSCD

- Complete with cylinder scuff guard, SCBA fill connection, fill hose and bleed valve
- Fill control panel with adjustable regulator, relief valve, manual control valve and pressure gauge for each fill position (S version only)
- Safety Door Interlock
 - Ergonomic "Easy Load" door
 - Convenient door handle actuation
 - Bottom venting
 - Remote fill outlets
- CFSII M versions designed for use with remote air distribution panel
- Mounting base is standard on "S" version and optional on "M" version
- Ergonomic Loading Height
- Reduced footprint

**Compliant to
fill 5500 PSI
cylinders**

PortaCount® Respirator Fit Testers

PortaCount Fit Testers provides a consistent and objective testing experience across respirator types equipped with >99% efficient filters. FitCheck Mode shows in real-time how respirator fit changes throughout donning and adjustment, helping users select the right mask and identify the best fit more quickly. Video animations guide staff through proper fit test exercise movements during a fit test, providing a consistent testing experience and freeing fit test administrators to multitask. Group fit testing allows administrators to test up to four personnel with four PortaCounts simultaneously

**Model 8040 - Tests Respirators, Gas Masks,
SCBA Facepieces**

Model 8048 - Tests All Types Including N95

The Best Fit Test - Now the Fastest

OSHA has announced changes to their Respiratory Protection Standard which affect the Ambient Aerosol Condensation Nuclei Counter (CNC) Quantitative Fit Test (QNFT) Protocols for Full-facepiece and half-mask elastomeric respirators, and Filtering facepiece respirators. Total fit test time is reduced from 7:15 minutes to 2:29.

Portable Scene Light Rechargeable Scene Light

The Portable Scene Light series continues to grow - the original model features a 72" extension pole and the Portable Scene Light EXT features an 84" extension pole. Rapidly deployed and easily stowed, they feature a narrow footprint that lets you bring this light almost anywhere from wide open places to tight, confined spaces.

Portable Scene Light II Rechargeable High Lumen Scene Light

Turn to a higher power with the rechargeable Portable Scene Light II. This waterproof area light requires zero deployment time and features a 360° rotating head so you can aim the light where you need it. Need more light for a job? Stack multiple lights for a "light tower" configuration. Cordless and compact, this scene light eliminates tripping hazards common with corded lighting options. Plus, portability from job to job is a snap.

Fire Vulcan® 180 Standard System Rechargeable Led Lantern

Lightweight and portable, the Vulcan 180 is designed to burn brighter and run longer making it an essential firefighting and utility tool. This rechargeable, waterproof lantern has a 180 degree tilting head which allows you to direct the light where you need it. Three LEDs bring you extreme brightness along with two blue taillight LEDs for visibility in thick smoke.

NEW

SURVIVOR® X

Increased output with added features, the C1D1 safety rated Survivor X right-angle light is available as a fully rechargeable system or an economical alkaline model that provides a 25% cost savings on batteries.

High, low and emergency flash modes:

- High for a super-bright, smoke piercing beam: 250 lumens; 447m beam distance; runs 3.75 hours (Li-Ion); runs 5 hours (alkaline)
- Low for longer run time: 60 lumens; 237m beam distance; runs 15 hours (Li-Ion); runs 15 hours (alkaline)
- Flash for signaling: runs 8 hours.

Vantage 180 LED Helmet Light

Giving you the ultimate versatility in a firefighter's light, the Vantage 180 goes instantly from a helmet light to a handheld light to a right-angle light. So wear it, hold it, clip it, or even hang it!

Features C4® LED with high and low modes: High for a super-bright spot beam: 250 lumens; 7,200 candela; 170m beam; runs 4 hours, Low for a less intense beam and longer run time: 100 lumens; 2,650 candela; 103m beam; runs 12 hours.

Vantage II Helmet Light

The Vantage II is the next generation of reliable hands-free lighting tools for fire helmets and hard hats. It's compact, powerful, shock-proof and virtually indestructible!

High and low modes:

- High: 350 lumens; 118m beam; runs 2.25 hours
- Low: 135 lumens; 80m beam; runs 5 hours

Waypoint® 300

The lightweight, lithium ion rechargeable Waypoint 300 shines bright, producing 1,000 lumens with a far-reaching 1,039m beam!

1-800-327-5312

**Elkhart
Brass**
Fire Fighting Equipment

CHIEF XD™

Chief XD Nozzle

The Chief XD takes the industry standard for handline nozzles to a whole new level. It offers accurate high volume flows at low tip pressures and is built tough like no other nozzle for Xtreme Duty, or XD. Forged shutoff body and forged metal bale handle for maximum strength, with a full round metal ball for the best stream performance, as well as fixed molded urethane or spinning stainless steel metal teeth that don't break.

XD Shutoffs w/ Smooth Bore Tips

Elkhart Brass XD Shutoffs and Smooth Bore Tips are designed and constructed for rugged use and reliable performance. They are built strong with forged shutoff bodies and forged metal bale handles, providing an excellent foundation for break-apart applications using smooth bore or fog nozzle tips. The 187-XD and 188-XD smooth bore tips feature durable urethane bumpers and laser etching. Extra knurling has also been added for increased control and grip. Available Sizes: 7/8" - 15/16" - 1" - 1-1/16" - 1-1/8" - 1-3/16" - 1-1/4"

order online @ www.seawestern.com

SELECT-O-MATIC^{XD}

**Elkhart
Brass**

Fire Fighting Equipment

Select-O-Matic XD Nozzle

The Select-O-Matic XD automatic handline nozzle adjusts to fluctuating water supply conditions to maintain effective pressure and a consistent fire stream in all flow ranges. It does so by generating back pressure by using a patented internal spring design that leaves the waterway unobstructed. This mechanism ensures a quality fire stream, regardless of flow.

RAM^{XD}

RAM XD Portable Monitor

The RAM XD is easily deployed and operated by a single firefighter. Its patented hydraulic stability system harnesses reaction force to stabilize the monitor. Four fold-out forged aluminum legs with carbide-tipped ground spikes extend to the largest footprint in its class for exceptional stability. The rear ground spikes are angled to help the carbide tips grip the ground surface.

Standpipe Kit

An essential part of any firefighting operation, basic standpipe equipment will aid in an efficient and effective fire attack by helping crews overcome many of the unknown variables that could be faced in a standpipe equipped building.

1-800-327-5312

COMBAT READY

- Featuring a one-piece extruded through-the-weave nitrile inner lining
- 1.88" internal diameter
- Great kink resistance
- Superior heat resistance
- Designed for use with low or high pressure nozzles
- Targeted flow rates 160-185 gpm
- 10 year warranty

1 year all hazards warranty

COMBAT SNIPER

- Unique one-piece extruded through-the-weave nitrile inner lining
- 1.78" internal diameter
- Great kink resistance
- Superior heat resistance
- Designed for use with low pressure nozzles
- Targeted flow rates 145-175 gpm
- 10 year warranty

1 year all hazards warranty

TRU-ID

- Virtually kink resistant
- True Internal Diameter 1.75"
- Designed for use with low pressure nozzles
- Built to reduce hose whip
- Targeted flow rates 145-175 gpm
- 10 year warranty

1 year all hazards warranty

FDNY

- This is the sister to the Big10
- Designed for big water with 1.88" inside diameter
- Robust construction
- Designed for use with low pressure nozzles
- Targeted flow rates 160-185 gpm
- 10 year warranty

1 year all hazards warranty

order online @ www.seawestern.com

ECO 10

- Double jacket construction
- EPDM rubber lined
- Overall thin wall construction
- Designed for great packability
- Designed for use with 100psi nozzles
- Targeted flow rates 150-185 gpm
- 10 year warranty including lifetime liner delamination guarantee

BIG 10

- 100% premium ring spun and filament polyester fibers
- EPDM rubber liner
- Overall thick walls construction
- UL Listed
- Designed for use with 75psi or 100psi nozzles
- Targeted flow rates 160-175 gpm
- 10 year warranty including lifetime liner delamination guarantee

PRO-FLOW LDH

- Large diameter supply hose
- Nitrile/PVC through-the-weave design
- Thin exterior ribs for flexibility and packability
- Lighter weight than traditional rubber hose
- Heat resistant, Ozone and Chemical Resistant
- 10 year warranty

HY-FLOW

- The rugged flexibility of filament polyester over a thin wall, high tensile EPDM rubber liner
- Extremely lightweight, easy to handle double jacket attack or supply line
- Combines minimum weight with maximum flexibility & abrasion resistance
- Mildew, chemical and UV resistant
- 10-year warranty and guaranteed not to delaminate for the life of the hose

Wildland Forestry Hose 187 Type II

- Lightweight design
- Tight jacket weave which reduces snagging and pulling
- Flexible and pliable
- Meets USDA-US Forestry Services Specification 5100-187 TYPE 2.

TRAINING PRODUCTS

SMARTDUMMY™ Rescue Manikins

- Integrated Voice Box / Recorder in head
- No Pinch Points
- More Durable vs. conventional rescue mannequins
- Realistic / Anatomically correct weight distribution over entire body
- Available in 55 lbs. and 110 lbs.

SMARTDUMMY™ Extrication Manikins

- All the same features of the SmartDummy plus...
- Severable Arm & Leg
- Torso impalement point
- Available in 55 lbs. and 110 lbs.

SMARTDUMMY™ Thermal Manikin

- All the same features of the SmartDummy plus...
- Thermal signature for use with TIC's
- Available in 66 lbs.

Smoke Generator 1000

- Generates 1000 cubic feet of smoke to zero visibility in 1 minute
- Immediate smoke production - no warm up
- Handheld, Portable & simple to use
- Durable steel construction weights only 17 lbs

Smoke Generator 4000

- Generates 4000 cubic feet of smoke to zero visibility in 1 minute
- Dual heating core
- Immediate smoke production - no warm up
- Portable, weighs only 45 lbs.

Smoke Liquid - 10 Liter and 20 Liter

- Proprietary non-hazardous smoke production
- Water based, leaves no residue like other smoke machines
- For best results, use LION's proprietary smoke machine cleaner too

BULLSEYE™

Don't let the first time they handle an extinguisher be during a real fire. Prepare them to successfully put out a fire using the BullsEye Digital Fire Extinguisher Training System.

R.A.C.E. STATION

Upon discovery of a simulated fire, trainees can put R.A.C.E. (Rescue, Alert, Confine, Extinguish) to the test by alerting with the Emergency Phone and/or pull station before attempting to extinguish the fire.

ATTACK™

The ATTACK Digital Fire Training System combines digital flames, sound and smoke to create a range of fire conditions that respond directly to hose line application. Train with a seat of fire in acquired structures, training towers or any other location where live fire isn't possible or practical.

LION TRAINING PRODUCTS

I.T.S.™

Through the use of innovative, patented technology, the Intelligent Training System (I.T.S.) provides clean, safe and cost effective extinguisher training. The Intelligent Training System senses where the trainee aims and sweeps the SmartExtinguisher® training extinguisher and varies the flames automatically, putting the fire out only when the proper technique is used.

I.T.S. XTREME™

Propane-fed flames, intelligent props, as well as class of fire and difficulty level settings make I.T.S. Xtreme the world's most advanced live fire extinguisher training system.

HOSE LINE TRAINING SYSTEM

The LION Hose Line Training System is a heavy-duty fire training tool designed to handle the requirements of advanced fire suppression training. The system's stainless steel construction and rugged components mean you can run evolution after evolution for years to come. Hit the system with virtually anything in your firefighting arsenal for intense hands-on training.

isodri®

Game-Changing Turnout
Gear Moisture Management
Technology from LION®

125
YEARS
1898-2023

IsoDri is more than just an outer shell that resists water penetration and absorption. It is a complete system of components (outer shell, moisture barrier, thermal barrier and wristlets) that works together to reduce the water in your turnout gear and the dangers that water presents.

Features:

- **Lighter** - Less water on the inside means your gear will be lighter.
- **Dryer** - Gear dries faster between runs as it will absorb less water.
- **Safer** - water transfers heat 21 times faster than air, you want more insulating air in your thermal liner than sweat or water

PF Zero™

PF Zero™ is a non-fluorocarbon based water and stain repellent finish with exceptional durability for maximum protection. PF Zero™ is the first commercially available fluorine free water repellent finish for first responders.

Visit <http://www.pf-zero.com> to learn more

Semper Dri™

To reduce the stress on you and turnout wear, Semper Dri...

- Employs a special treated thermal liner material to reduce absorption, staying drier and lighter
- Is standard in the waterwells of turnout coat sleeves and in the shoulder/yoke area of coat liners and the bottom of pant liners.
- Helps reduce turnout gear drying time

LION[®]

INTRODUCING

REDZONE[™]

Contaminant Control Package

When tones drop and you arrive on the scene of a fire, your turnout gear and hood are immediately exposed to a number of toxic chemicals – exposure that can result in serious health problems. That includes cancer, which is currently the leading cause of U.S. firefighter deaths. With that fact in mind, LION has developed **RedZone[™]**, our exclusive PPE contaminant control package.

RedZone features five particulate-blocking zones designed to help reduce your exposure to the dangers

To learn more about our new **RedZone** Contaminant Control Package, visit lionprotects.com/redzone.

3

**ZONE 1:
PARTICULATE-
BLOCKING HOOD**

A breathable, ultra-soft hood with **StedAir® PREVENT** protects the head and neck from particulates, while also providing excellent mobility and unrestricted hearing during firefighting activities.

**ZONE 2:
ARM GUARD**

Elasticized wrist shields and enhanced **IsoDri®** knit wristlets with **Nomex® Nano Flex** help block particulates at the coat-to-glove interface.

**ZONE 3:
CORE GUARD**

A **Nomex® Nano** multi-layered composite with an elasticized band helps reduce particulate ingress at the coat-to-pant interface.

**ZONE 4:
CLOSURE GUARD**

Engages with just one zip. No extra steps to don the gear. Red hook and loop indicates when turnout coat is properly closed.

**ZONE 5:
LEG GUARD**

Together, the elasticized ankle shield and **Nomex® Nano Flex** calf protector help block particulate exposure at the pant-to-boot interface.

RAINIER SPEC in PbiMAX™

YOUR JOB IS NEVER EASY, DON'T LET YOUR GEAR MAKE IT HARDER.

SeaWestern's Rainer Spec V-Force® turnouts from LION, provide a cut-in-motion design that moves the way you do, while still offering unparalleled protection.

KEY V-FORCE COMFORT & MOBILITY DESIGN FEATURES

Comfort Collar

Ergonomically shaped to improve comfort, interface better with other PPE elements and deliver continuous thermal and moisture protection.

V-Fit™ Elbows, Legs, Knees & Sides

Elbows and knees include cutouts, shaped pieces and darts to allow natural arm and leg movement without restrictions or tugging. Contoured coat side panels have a more tailored fit to move with your body during firefighting activities.

Raglan Sleeves

Shaped like your arm to promote free, unrestricted movement and reduce turnout coat hem rise.

Superior Cut

Evenly distributes the weight of your turnout and positions seams to reduce conflicts with SCBA straps that can cause irritation and discomfort.

Radial Inseam

Eliminates crotch seams to reduce tension and provide added pant comfort, while also extending the useful life of your turnout pants.

LION Ventilated Trim™

Provides a conduit for the release of vapor and guards against the potential hazards of trapped moisture. It's also more flexible than traditional reflective trim.

PACIFIC SPEC in ARMOR^{AP}

125
YEARS
1898-2023

**YOUR JOB IS NEVER EASY,
DON'T LET YOUR GEAR MAKE
IT HARDER.**

SeaWestern's Pacific Spec V-Force® turnouts from LION, provide a cut-in-motion design that moves the way you do, while still offering unparalleled protection.

KEY V-FORCE COMFORT & MOBILITY DESIGN FEATURES

Comfort Collar

Ergonomically shaped to improve comfort, interface better with other PPE elements and deliver continuous thermal and moisture protection.

V-Fit™ Elbows, Legs, Knees & Sides

Elbows and knees include cutouts, shaped pieces and darts to allow natural arm and leg movement without restrictions or tugging. Contoured coat side panels have a more tailored fit to move with your body during firefighting activities.

Raglan Sleeves

Shaped like your arm to promote free, unrestricted movement and reduce turnout coat hem rise.

Superior Cut

Evenly distributes the weight of your turnout and positions seams to reduce conflicts with SCBA straps that can cause irritation and discomfort.

Radial Inseam

Eliminates crotch seams to reduce tension and provide added pant comfort, while also extending the useful life of your turnout pants.

LION Ventilated Trim™

Provides a conduit for the release of vapor and guards against the potential hazards of trapped moisture. It's also more flexible than traditional reflective trim.

LION MT94 - High Performance Fire Rescue Gear

- Hot Zone protection - certified to NFPA 1994, Class 2 and NFPA 1992 for hot zone operations
- Streamlined, light-weight design for maximum comfort and natural freedom of movement
- Rugged construction allows you to perform in the most challenging
- Re-usable for multiple wears and washings when not exposed or contaminated
- Multiple Configurations made from durable materials offer maximum protection with uncompromised mobility
- Available in Navy or Tan

LION ERS - Extended Response, Extreme Dexterity

- Protection against TIC's, TIM's and CWA's below IDLH concentration levels while performing technical and tactical operations
- Dual-Certified Version: NFPA 1994, Class 3, NFPA 1992
- Multi-Certified Version: NFPA 1994, Class 3, NFPA 1994, NFPA 1994, Class 4, NFPA 1999 Single Use, NFPA 1992
- Certified with variety of face pieces and boots
- Selectively permeable membrane for improved mission time and performance
- Eight-hour wear life, if not damaged, exposed or contaminated
- Fully sealed seams eliminate need for external taping
- Tapered legs with elasticated cuffs and attached booties for increased functionality and mobility

LION FRS Flood Response Suit

The FRS (Flood Response Suit) protects against lower levels of liquid concentrations that may be encountered in flood zones or stagnant water where wading is appropriate.

- Stagnant water search and rescue
- Medical triage / first receiver for stagnant water accident victims
- Escape from contaminated stagnant water environments
- Clean up (Where no airborne contaminants)

American Legend Helmet

LION's American Legend traditional fiberglass fire helmet, provides outstanding head, eye, ear and neck protection, while also offering additional head room. Light weight for on-the-job comfort and mobility. SMC shell with a powder coat, impact-resistant finish, Impact cap with a ratcheting headband, cushioned with Nomex foam wrap Suspension, and a 3-position rear ratchet height adjustment.

With 4" Faceshield or ESS Goggles

American Legend Helmet

LION's American Legend traditional fiberglass fire helmet, provides outstanding head, eye, ear and neck protection, while also offering additional head room and a light weight for on-the-job comfort and mobility.

With Integrated Goggle System

Legacy 5 Modern Helmet

Features Shell with State-of-the-art fiberglass materials for light weight and structural integrity. RTM technology provides color pigmentation throughout the shell. Lexan® ABS dome encapsulated with urethane foam for outstanding thermal resistance. Suspension, patented Center of Gravity™ adjustment system lets you set the center of gravity to your liking and keeps it positioned in place. Adjusts from size 5½ to 9½. Headband is cushioned with foam and covered with black knit DuPont™ Nomex® brand fiber for comfort and secure fit.

With 4" Faceshield or ESS Goggles

order online @ www.seawestern.com

First Due Structural Helmet

The safest firefighting helmet is the one you keep on your head. Since it is the lightest structural NFPA 1971 compliant helmet, boasting a low center of gravity and central balance, it is less likely to create the neck and upper back fatigue so many are used to during long incidents. The First Due Structural is compliant to current OSHA and NFPA 1971 and NFPA 1951 standards.

With 4" Faceshield or ESS Goggles

TC-1 Traditional Composite Helmet

Phenix Technology Inc.'s Traditional Composite helmet boasts a low center of gravity and is enter balanced, thus, promoting a very low degree of neck fatigue. Our traditional composite models interface with any SCBA mask. We offer several options when building your custom TC-1. The TC-1 is compliant to current OSHA and NFPA 1971 standards.

With ESS Goggles

TL-2 Traditional Leather Helmet

The TL-2 Traditional Leather fire helmet is the lightest NFPA compliant authentic leather helmet on the market. Worn by firefighters worldwide, the TL-2 combines tradition and modern safety in a handcrafted masterpiece. Compliant to OSHA & NFPA 1971 standards.

With ESS Goggles

1-800-327-5312

Particulate Hood

LION's RedZone Particulate Blocking Hood protects one of the most vulnerable areas of your body by preventing up to 98% of particles from ever touching your face or neck. Using a 2-layer design with LION exclusive StedAir® PREVENT particulate blocker, RedZone has outstanding breathability, increased air permeability and unique construction for ease of movement and flexibility.

Black/Grey

Tan/Grey

Majestic Firefighter Hoods

Majestic's firefighter hoods are NFPA 1971 Compliant / UL Certified to the latest edition. These fire retardant hoods provide unparalleled comfort, protection, and value. Their fabrics are inherently protective, which allows for the ultimate in protection against radiant and intense heat without the risk of the protective nature being "washed out".

Missoula 2.1 Boots

The HAIX Missoula 2.1 was built to meet the exacting demands of the wildland firefighter. The durably tough European split bull leather is water-resistant, hydrophobic and breathable to keep your feet as comfortable as possible. The lighter weight of the Missoula 2.1 helps to alleviate leg fatigue while on long hikes, since the less weight you have on your feet, the less energy you have to expend while walking. Offering not only safety protection, but comfort, for those who can spend all day on their feet in the most rugged of terrain.

Black Leather Boot Polish

1-800-327-5312

QR14 Leather Boots

LION QR14 bunker boots are built for comfort, durability and safety. The flex gussets allow the boot to move with you. 3M Scotchlite Hi-Vis piping in these waterproof, flame- and cut-resisting leather bunker boots creates a high-visibility look when exposed to direct light.

Stocked @ SeaWestern

Station 1 Wildland / EMS Boots

These hard-working boots never clock-out, even if your shift turns into a double. Our exclusive Vibram ATS (All-Terrain Sole) provides exceptional traction on any surface. GORE CROSSTECH triple layer moisture barrier is the toughest in the industry prepared for everything.

KnockDown Elite™ 14" Leather Boots

Waterproof, flame-resisting leather upper with abrasion-resisting rubber toe and heel protection. Removable dual-density polyurethane insole. Lenzi L-Protection® flexible, non-metallic, puncture-resisting insole. Steel triple-rib ladder shank, and exclusive Vibram® ATS sole with Fire & Ice technology. Cement construction.

Hellfire Boots

Enjoy superior protection and grip while fighting fires in these flame and heat-resisting rubber light insulated structural bunker boots with lug sole. The stainless steel, puncture-resisting bottom plate provides a barrier between your feet and whatever you have to walk over to contain the fire. Experience added safety in the form of an oversized steel toe.

FirePRO™ 300

Personal Thermal Camera for Improved Situational Awareness and Firefighter Safety.

- Viewing Angle - Ergonomic 90°
- Resolution - 320 x 240
- Field of View - 57° x 42°
- Durability - IP67 waterproof, 2 meter drop
- Detection - -20°C to 550°C (-4°F to 1022°F)
- Imaging - Mixed Gain with SV1 Technology
- Flashlight - 300 Lumen LED

Reveal FirePRO™ X

Personal, Affordable, High-Resolution TIC for Firefighting.

- Resolution - 320 x 240
- 32° Field of View
- IP67 Rating
- Detection - -20°C to 550°C (-4°F to 1022°F)
- Simple Magnetic Charge Port
- Flashlight - 300 Lumen LED

AttackPRO+

NFPA 1801:2021 CERTIFIED

Decision Making High-Resolution TIC for Firefighting.

- Resolution - 320 x 240
- Field of View - 57° x 42°
- Durability - IP67 waterproof, 2 meter drop
- Detection - -20°C to 550°C (-4°F to 1022°F)
- Imaging - Mixed Gain with SV1
- Flashlight - 300 Lumen LED

AttackPRO[™]

Decision Making, Durable, High-Resolution TIC.

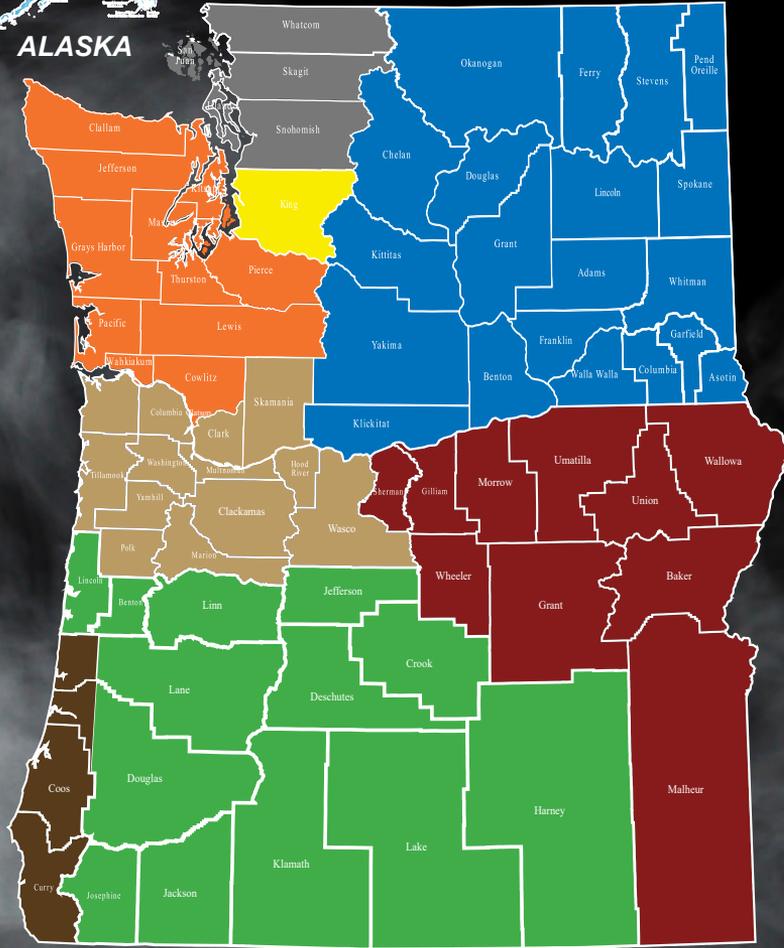

- Resolution - 320 x 240
- Field of View - 57° Horizontal
- Durability - IP67 Ingress Protection
- Detection - -20°C to 550°C (-4°F to 1022°F)
- High Impact and Heat Resistant
- Flashlight - 300 Lumen LED
