

Powder-Coated Planters - Typical Specification

Materials	
Metal	0.8 Gauge Galvanised steel sheets (0.9 - 1mm thickness)
Finish	PPC (Polyester Powder-coating) in most standard RAL colours (Gloss standard, or Matt and Satin optional at extra cost)

Fabriaction	
Seams	All seams are fabricated by way of a 'lockform' arrangement
Corners	All corners are fixed with rivets
Drainage	As standard our planters are made with drainage holes (1cm D) in the bases and are not water tight. Planters can be specified without drainage holes
