

UNICO has been made in Italy by Olimpia Splendid since 1998.

## UNICO® PRO inverter 12 HP

The most powerful air conditioner without an external unit

No outdoor unit!

### OUR COMPANY

Olimpia Splendid was the first company to understand that eliminating the outdoor unit is first a matter of personal choice, not just a requirement; over 10 years ago we designed Unico, the first wall-mounted air conditioner without an outdoor unit. Its success grew year after year in Italy and around the world and now with both standard and inverter versions Unico can now meet every need in terms of power, installation and decor requirements.

### INSTALLATION

As for the installation of Unico units, everything can be done from inside the house; holes and grille fitting included. No need for complicated work on external walls high up where booms or scaffolding would be required, thus saving time and money. In terms of its functions, Unico is a true technological gem, capable of programming and optimizing climate room by room as well as dehumidifying and purifying the air.

### WHY UNICO?

Bulky outdoor units are obtrusive, noisy and unsightly. These negative characteristics become even more negative when the unit needs to be installed on a balcony or terrace. But the absence of an outdoor unit is only one of the extraordinary qualities that Unico can boast; a feature that benefits buildings and towns by respecting their aesthetics.

## KEY FEATURES AND BENEFITS:

- No outdoor compressor
- No external installation required
- Inverter for maximum efficiency
- Reverse cycle for year round comfort
- Can be high or low wall mounted
- Ideally suited for heritage listed buildings and apartments with limited balcony space
- Conforms to current MEPS Standards
- Environmentally friendly R410A refrigerant
- Silent mode operation
- Two year residential parts and labour warranty

Low noise operation

Full function remote with LCD display

Made in Italy

Inverter for maximum efficiency

### SPECIFICATIONS

Cooling capacity (max)	3.4 kW
Heating capacity (max)	3.0 kW
Dehumidification mode	Yes
Dimensions (W x H x D)	903 x 520 x 215 mm
Weight without packaging	39 kg
Diameter of holes in wall	202 mm
Refrigerant gas/load	R410A
