

## ASSEMBLY:

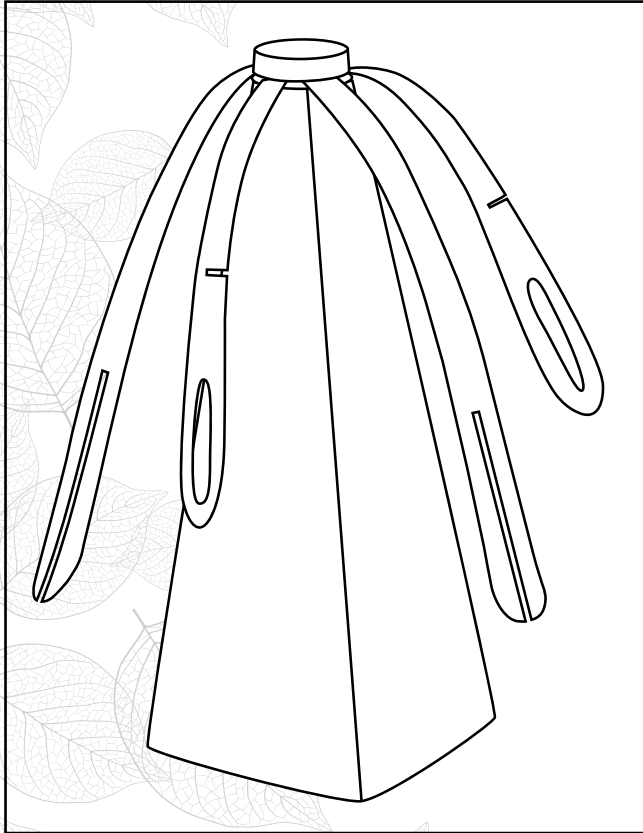

Figure 1

### Battery Installation:

**Step 1:** Remove the Table Guard Fly Fan™ from the packaging (Figure 1).

**Step 2:** Open the Battery Compartment Door (Figure 2 (A)). The Battery Compartment Door swings open (Figure 3 (A)).

**Step 3:** Insert 2 AA Batteries into Battery Compartment (Figure 3 (B)) (Batteries not included, for best results use fresh batteries).

**Step 4:** Close the Battery Compartment Door (Figure 4 (A)). The Battery Compartment Door has a tab that fit into a corresponding slot. Swing and snap closed (Figure 5 (A)).

**Step 5:** If you wish to hang the Table Guard Fly Fan™ from the ceiling, a built in hook on the base of the fan (Figure 7 (A)) allows it to hang upside down, and a notch in the hook ensures it will hang straight.

## OPERATION:

### Operation:

1. When the Table Guard Fly Fan is turned on (Figure 6 (A)), it will run for 4 hours and then automatically shut off. After 4 hours you can restart your Table Guard Fly Fan by turning the unit off and back on. The Table Guard Fly Fan will then run for another 4 hours. The Table Guard Fly Fan can be turned off at any time turning the switch to the off position.
2. When the speed of the Fan Blades slow down considerably, it is time to install new batteries.

### Configurations:

**Configuration 1.** When the Table Guard Fly Fan operates in Configuration 1 mode, it creates a 2 Dimensional spatial plane (Figure 8).

**Configuration 2.** In this configuration the Table Guard Fly Fan creates a 3 Dimensional spatial plane further increasing its effective area (Figure 9 & 10). Simply lift up the two short blades (Figure 9 (A) & (B)). Slide the two blades together where the slot is cut in the middle of the blades (Figure 10 (A) & (B)). This locks the two blades together for 3 Dimension operation.
