

# Multipest Insecticide 1L

## Application guidelines

Always read label and SDS first (disclaimer) then come here and read the bellow

Apply with a calibrated back pack sprayer and flat fan nozzle then water it off the leaf and into the soil with 3mm of irrigation.

This product is to be sprayed at first sighting of insect damage.

Measure your area

The product rate is 12-44ml per 100m<sup>2</sup> depending on target pest

Water rate is 6-8l per 100m<sup>2</sup> though I am also happy to see it go out at 4L-6L per 100m<sup>2</sup> as it will all be getting washed straight into the soil post application with water anyhow.

You can spray at any time of day and can mix it with propel or retain pro.

Wear gloves, eye protection, shoes and long pants and shirt.

Dont spray in winds above 15klm/ hour.

Rate varies depending on targeted pest 12ml-44ml per 100m<sup>2</sup>(I would use the higher rate)

Water rate is 2L- 8L per 100m<sup>2</sup> Recommended nozzles to achieve this is a 025-04- 08 Nozzle

It can be mixed with wetting agents and most soil amendments

**Safety directions** are to avoid contact with eyes and skin. When opening the container, preparing the spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist, washable hat, elbow-length PVC gloves and goggles. If product in eyes, wash it out immediately with water. Wash hands after use. After each days use wash gloves, goggles and contaminated clothing.

If poisoning ever occurs please call 13 11 26
