

# STEP ONE

Space all posts evenly measuring from inside edge of posts.

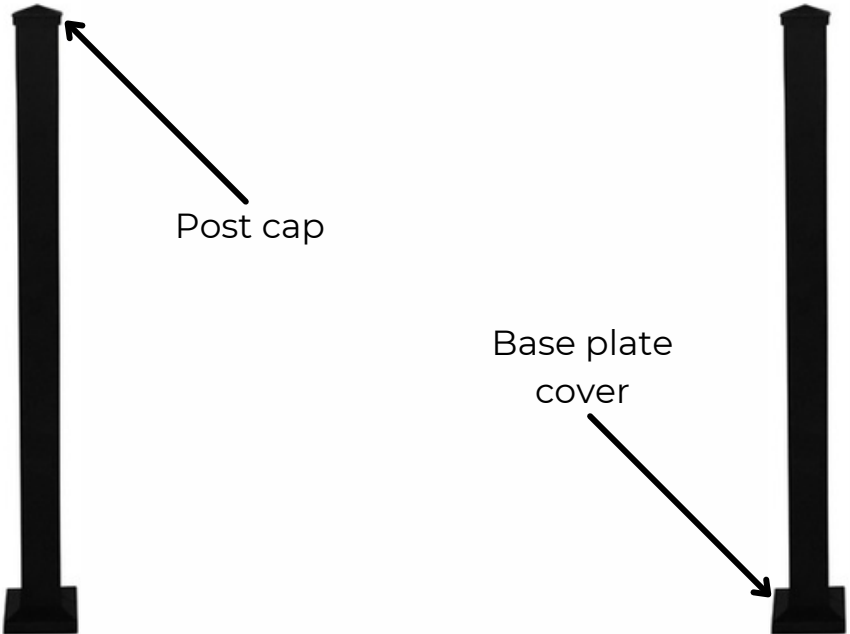

Level posts & secure with (4) structural screws per post.

# STEP TWO

Mount post caps over top of post and press down.

Install (2) piece base plate cover around base of post.

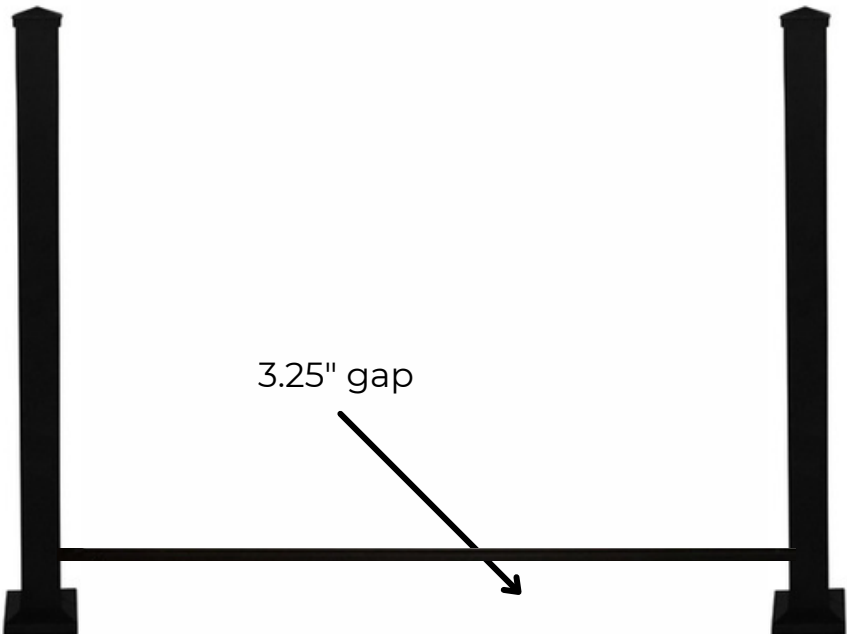

# STEP THREE

Cut glass rails w/ gasket 1/4" shorter than measurement from inside edge of posts.

Slide (4) top & bottom brackets over each end of glass rails w/ lag screws facing down.

Mount bottom brackets to posts and leave 3.25" gap under bottom rail.

Install support leg on longer sections (if required).

# STEP FOUR

Insert glass pane into bottom rail gasket, then install top rail with gasket over top of glass pane.

Mount top rail to posts w/ top & bottom brackets.
