

Slide & Go® Fence

HORIZONTAL FENCING SYSTEM

The TruNorth Slide & Go® Enviro Fence is a horizontal fencing system was specifically designed to provide:

- The strength and endurance of aluminum
- The durability & low-maintenance of composite
- The warmth and privacy of a natural wood fence

We combine 3 inch square aluminum fence posts and two custom-designed, left and right aluminum "U" channels with our Enviro Fence board. The 9'4" long posts are set in concrete just like a wood fence post.

Then we slip these easily down the channels which are attached to the aluminum fence posts. The finished result is a residential yard fence that has virtually no maintenance, and a framework that will not warp, crack, lean, or rot.

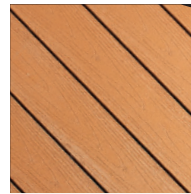

Twelve beautiful shades to choose from.

All TruNorth® composite fence boards are available in six bold and modern solid colors as well as six variegated hues. A full suite of complementary square edge and fascia boards in matching colors are also available.

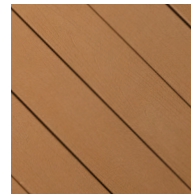

SOLID COLORS

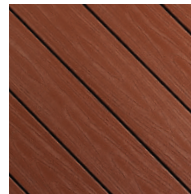

Mocha

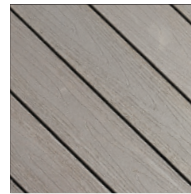

Caramel

Brulee

Bordeaux

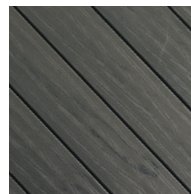

Stone Grey

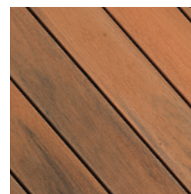

Sand

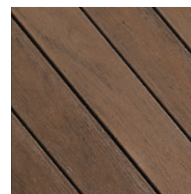

VARIEGATED COLORS

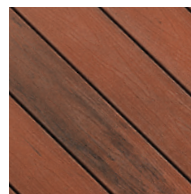

Ash Grey

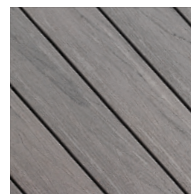

Tigerwood

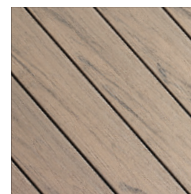

Tropical Walnut

Brazilian Cherry

Amazon Grey

Hazelwood

*Actual colors may vary slightly.

The **strength** of aluminum and the **warmth** and look of wood.

- 14 Enviro Fence Boards stacked together are required to create a 6 foot tall fence panel
- Horizontal Slide & Go® fencing can be built in sections up to 6 feet wide
- The boards are available in 12 foot lengths and, as such, can be cut to the exact length required after the posts are set
- Self tapping and board screws are included with the post and U-channel sets
- A horizontal cap rail can be added onto the top of the finished panel for a nice, clean, finished, look on the top of your fence

- Fade & stain resistant with 20-Year Limited Warranty
- Never paint, stain or seal
- More durable than other composite boards
- Heat blocking technology keeps deck cooler

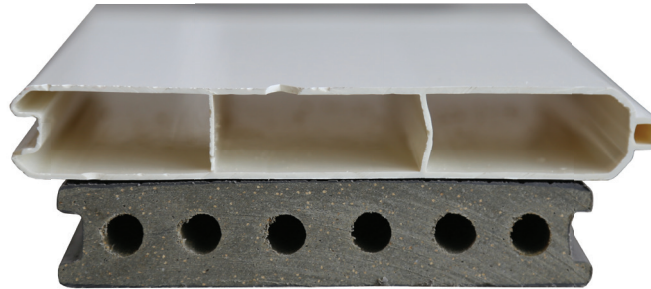

- Rice husk formula means no rotting or molding
- Eco friendly product made with 95% recycled materials
- Reversible boards with capping on all four sides

Built to stand the test of time.

You want the best, and we deliver the best. TruNorth® is the only company that offers wood and wood filler-free capped rice hull composite decking. Our rice hull fiber composite is made from a rice hull fiber composite that is proven to resist water penetration, which means your beautiful deck will not mold, rot, or swell. Since we encapsulate both sides, you have the comfort of knowing you can flip the boards over in the future if you damage them.

Our goal is to keep your outdoor escape looking great while being enjoyed by the whole family. Our proprietary capping helps keep your family safe from slips and slivers, prevents spilled liquids from leaving a permanent stain, reduces heat retention and minimizes fading from harsh weather.

How does the competition stack up?

Vinyl fence panels

- Susceptible to algae, mold and mildew
- Cold weather can make vinyl fence brittle and more prone to damage
- Requires frequent cleaning to remove stains & mildew
- Susceptible to fading
- Look of vinyl is not as aesthetically pleasing

Enviro Fence panels

- Will not rot or mold
- Exceptionally durable and built to withstand extreme weather
- Color does not fade
- Eco-friendly rice husk formula made with 95% recycled materials
- Wood grain finish for the natural look of wood without the maintenance

Slide & Go® Fence

HORIZONTAL FENCING SYSTEM

High quality, low maintenance, eco-friendly, long-lasting... **fencing simplified.**
