

# Ring Size Chart

## How to use this size chart:

1. Print at actual size (100%), so the measurements aren't distorted.
2. Place a ring, that fits the intended person, on top of the circles to find the size by matching the outline of the circle to the inside of your actual ring. The line should be just visible inside the ring.
3. Any doubts just get in touch for help or advice.

\*The feel of a ring may vary depending on its width. It may be advisable to go up a size on wider rings.

\* # = Ring size (inside circumference)
