

MELKER RÖDLÖGA

This plant-based kayak is agile, playful and as fast as a rocket! The adjustable skeg allows for true tracking in even the most challenging waters. The paddler also has the option to drop in the rudder for swirling currents and long crossings. Features enough storage capacity for an extended weekend with a cockpit that offers exceptional comfort for full days on the water.

Melker's plant-based construction aims to revolutionize the industry and help protect the waters and environment we all love!
