## Fire-Fighting measures

Flash Point 199° F (92.78 C)  
Flammability Class IIIA Combustible Liquid  
Extinguishing Media: Carbon dioxide, dry chemical, foam. Do not use a direct water jet on burning material.  
Special Fire Fighting Procedures Wear NIOSH approved self-contained breathing apparatus and full protective clothing when fighting fires involving chemicals. Use water spray to cool containers exposed to fire.  
Unusual Fire and Explosion Hazards None Known

## Accidental Release Measures

Personal precautions: Avoid inhalation and contact with skin and eyes. A self-contained breathing apparatus is recommended in case of a major spill.  
Spillage: Clean up spillage promptly. Remove ignition sources. Provide adequate ventilation. Avoid excessive inhalation of vapors. Gross spillages should be contained by use of sand or inert powder and disposed of according to the local regulations.  
Environmental Precautions: Keep away from drains, soil, and surface and groundwater.

## Handling and Storage

Handling: Apply according to good manufacturing and industrial hygiene practices with proper ventilation. Do not drink, eat or smoke while handling. Respect good personal hygiene.  
Storage: Store in a cool, dry and ventilated area away from heat sources and protected from light in tightly closed original container. Avoid plastic and uncoated metal container. Keep air contact to a minimum.  
Fire protection: Keep away from ignition sources and naked flame.

## Exposure Controls/Personal Protection

### ENGINEERING MEASURES

Closed Systems: Wherever possible, use closed systems to transfer fragrances.  
Isolation: If appropriate, isolate mixing rooms and other areas where fragrances are openly handled and maintain these areas under negative air pressure relative to the rest of the plant.  
Ventilation: Use local exhaust ventilation meeting ACGIH design criteria around tanks and other sources of potential exposures, including places where fragrances are openly weighed or measured, as well as general dilution ventilation of the work area to eliminate or reduce possible worker exposures.

## PERSONAL PROTECTIVE EQUIPMENT

Respiratory Protection: Avoid excessive inhalation of concentrated vapors. Apply local ventilation where appropriate.
