OPTICOM

Insustrial Video Specialist

Lorem ipsum

Opticom Tech's Industrial's Video Solutions are ideal for Sawmills and other dusty & heavy vibrations areas.

The efficiency of operation and productivity are at their best when cameras are in place to help you and your team closely watch the mill process. Complete visual systems help operators view different areas on the line from one main point or multiple points throughout the mill.

Opticom Tech's products are built to last for the long haul. The CC02 Series and CC04 camera is designed to work in high vibration, high impact and high dust areas. They are compact in size and can be mounted directly to the machinery if needed. The IP68 waterproof rating and extreme temperature rating ensures that the cameras can be used for both indoor and outdoor applications.

It is also helpful to have a system with recording that can be used to troubleshoot problems within the mill. Opticom Tech has analog, HDTVI, and IP video solutions that are built to withstand sawmill installations and abuse.

ADDITIONAL BENEFITS OF ADDING A VISUAL SYSTEM:

- Operations of the sawmill
- Reducing downtime for manufacturing
- Security of the plant

Opticom Application Chart

	ANALOG	HDTVI	IP	
Inside on Machinery	CC02 w/ VM-1	CCO2-TVI w/ VM-1	CCO4-IP2MV	Camera
Outside on Machinery	CC02 w/ VM-1	CCO2-TVI w/ VM-1	CCO4-IP2MV	Camera
Silos/Gauges	CC02	CCO2-TVI	CCO4-IP2MV	Camera
	LCDI-19m w/ MVM-LCD-1	LCDI-215HDM w/ MVM-LCD-1		Monitor
	Silver Series DVRs (SVD)	Silver Series DVRs (SVD)	Silver Series NVRs (SVN)	Recorder
	QS4-8	Silver Series DVRs (SVD) No HDD		Splitter
