

MOBILE SAWS

ECOSTAR

Mobile crosscut saws by PRINZ are highly mobile and universal. They are the ideal entry-level model for efficient cross-cutting of ends and cutting through round timber and stacks. Easy to maneuver, they provide a convenient alternative to one-man saws. The ECOSTAR by PRINZ stands out due to its unmatchable price-performance ratio as well as its very wide range of applications.

- · Highly accurate cutting with one stabilizer
- Available with 10HP drive motor
- Automatic chain lubrication with 5 quarts oil tank for less downtime
- Easy chain replacement
- Solid rubber tires provide maximum stability
- Guide bar lengths up to 98 inches, also with special hard-faced edges
- Low purchase and operating costs for a quick payback

PROFICUT LIGHT

The mobile crosscut saws PROFICUT LIGHT (10HP) and PROFICUT STRONG (15HP) can be delivered with a package loading frame.

- High cut accuracy with 2 stabilizers
- Large front plate for exact squaring of saw and package
- Automatic lubrication of the saw chain
- Cross sections up to 51 x 51 inches
- Footrest

TWIN-L

For growing facilities and suiting our PROFICUT saws, custom your different package loading frame sizes.

- Saw is positioned manually and fixed
- Guide bar is always perpendicular to the package
- Saw remains a perfect position during the entire cutting process

Chain Guide Bars - Direct Replacement for Holtec

These guide bars are perfectly suited to meet the highest requirements for timber and round timber applications.

The running surfaces can be renewed several times and a special coating guarantees extreme

longevity. Additionally, the running surfaces have excellent gliding properties for the chain and the special ground material guarantees the highest cut accuracy. EXPERT-LINE guide bars offer up to 30% more longevity compared to other conventional guide bars.

GRES121OR	Pulley *w/o Bearing	134.54

CARBIDE TIPPED CHAINS - DURACUT 15/3

Pitch: 15mm

Link Thickness: 3mm

The small pitch gives great stability to the chain during the cut and the chain generates less noise.

Has a 6 times longer lifespan than a conventional chain. This chain is particularly suited for high capacity package saws for pallet producers or to process hardwood.
