

MORBARK®

MADE FOR **MORE** TO KEEP PACE WITH **YOU**

DENUBBER

**DEBARKER
HEAD**

The **Morbark DeNubber Debarker Head** thoroughly debarks logs and removes defects to help prevent trouble while sawing. Faster, more efficient and with lower maintenance costs than traditional heads, the DeNubber head can be interchanged and installed on any Morbark Debarker.

FEATURES AND BENEFITS

- All cutting teeth are individually attached and can be replaced singly if damaged. Only one tool is needed to remove the teeth, which are replaceable at a low cost and within minutes. Teeth are arranged in a spiral pattern, with 36 teeth on nine rows for full cutting coverage.
- The teeth actually cut the wood, creating chips that could be sold as mulch.
- Logs are thoroughly debarked and defects are removed to help prevent trouble while sawing.
