

# AC' gel

## Spot gel for intensive care on the troubled area

Intensive care spot gel that focuses on troubled area due to excess sebum secretion!

From troubled skin to a healthy skin,  
with excellent active ingredients

It quickly calms the troubled areas of the skin and maintains homeostasis with excellent active ingredients delivered intensively, which makes troubled skin healthy.

Compact size that is easy-to-carry

The easy-to-carry size allows you to apply it anytime and anywhere so you can see faster effect.

## Main components and effects

Tea tree leaf oil

DEFENSIL®

Okyongsan Extract

Betaine

Allantoin

Aloe Vera leaf extract

### Tea tree leaf oil

As oil obtained by distilling tea tree leaves, it helps clean the skin with excellent soothing effect and regulating excess sebum secretion.

### DEFENSIL®

It is an effective ingredient for sensitive skin developed by RAHN, Switzerland. It is a compound ingredient of balloon plant's flower/leaf/vine extract, echium plantagineum seed oil, and sunflower seed oil. It is involved in maintaining the homeostasis of the skin to help manage sensitive skin and improve the health of the skin.

### Okyongsan Extract

It is a medicinal herb complex based on the prescription of Okyongdan, a secret of beauty of 'Xi shi', one of the renowned Four Beauties of ancient China. It has excellent whitening effect by inhibiting the activity of tyrosinase, an enzyme which helps melanin production.

### Betaine

Betaine is a botanical moisturizing factor extracted from sugarcane, sugar beet roots, and others, which is an excellent ingredient that is dermatropic and has high absorption. It provides moisture to the skin, helps regulate moisture/oil balance, and prevents skin dryness.

### Allantoin

Allantoin is a natural ingredient extracted from plants such as oak tree, comfrey roots, sugar beet, and wheat and is suitable for sensitive skin and baby skin as it is hypoallergenic. It strengthens skin barrier and improves moisturizing function to protect irritated skin and smoothes the rough skin.

### Aloe Vera leaf extract

Aloe Vera, a Liliaceae plant with strong vitality, contains about 300 varieties of ingredients such as vitamins A, C, D, E, B12, amino acids and aloesin. It also protects sensitive skin and provides moisturize to the skin for prolonged period.

※The above is limited to the characteristics of the raw material

## How to Use

Apply 2 to 3 times a day to the areas of interest.

## Recommended for the following people

- Those who are suffering from troublesome skin due to excess sebum secretion
- Those who want to solve skin problem quickly by applying the product frequently
- Those who want intensive care on the troubled areas of your skin without irritation

# B' cream

Solve damaged skin problem at once!

The recovery cream that relieves the stress of the skin which has been damaged by external irritations

Relieves skin stress with excellent active ingredients

A selection of highly concentrated active ingredient relieves skin stress and provides a quick and effective skin protection.

It feels cool when applying, and feels warm after being applied which provides temporary comfort to the irritated area.

Every family member can use it safely

All natural botanical ingredients for the whole family to use safely.

Moist, soft and creamy texture that absorbs instantly without any stickiness.

## Before & After Use

[Gender : Female / Age : 70 years old / Implant procedure / use 5-6 times per day]

▲ Before

▲ After

▲ 6 days after Applied

※There may be an individual difference.

## Main components and effects

Allantoin

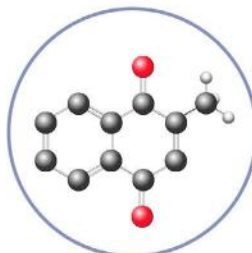

Menthyl nicotinate

Centella Asiatica extract

DEFENSIL®

Menadione

Infracin -Ex

### Allantoin

Allantoin is a natural ingredient extracted from plants such as oak tree, comfrey root, sugar beet, and wheat. It is suitable for sensitive skin and baby skin as it is hypoallergenic. It strengthens the skin barrier and improves moisturizing function to protect irritated skin and smoothes the rough skin.

### Menthyl nicotinate

Menthyl nicotinate increases blood flow velocity which helps to break down cellulite, and gives massaging effect to capillaries deep in skin. Compared with other nicotinates, it does not cause erythema and it provides both cooling and warming at the same time.

### Centella Asiatica extract

Centella asiatica is an herb plant that has been widely used for folk medicine, cosmetics and skin management for a long time. It is a plant with excellent effect, also called as tiger grass, which protects irritated skin, prevents dryness, and helps improve skin pores. It helps to keep the skin smooth and supple and is suitable for dry, oily and sensitive skin.

### DEFENSIL®

It is an effective ingredient for sensitive skin developed by RAHN, Switzerland. It is a compound ingredient of balloon plant's flower/leaf/vine extract, echium plantagineum seed oil, and sunflower seed oil. It is involved in maintaining the homeostasis of the skin to help manage sensitive skin and improve the health of the skin.

### Menadione (vitamin K3)

It is a type of vitamin K that provides more powerful vitamin K action than naturally existing phyloquinone and menaquinone. Vitamin K is a vitamin essential for blood clotting, strengthens the capillaries, and helps normalize the loose blood vessels, ultimately assist in alleviating redness.

### Infracin -Ex

A combination of boswellia serrata extract and centella asiatica extract protects and cares the damaged skin and prevents dryness. It is a hypoallergenic ingredient suitable for sensitive skin, helping to improve skin condition and promote healthy skin.

※The above is limited to the characteristics of the raw material.

## How to Use

Apply 2-3 times a day to the troubled areas frequently.  
Please avoid direct wound area and around eyes.

## Recommended for the following people

- Those who want to relieve skin stress caused by external irritations
- Those who want to soothe and recover the skin quickly
- Those who are suffering from frequent bruising

# L' Cream

Solve damaged skin problem at once!

The recovery cream that relieves the stress of the skin which has been damaged by external irritations

## Immediate skin soothing and elasticity effect

It contains Defensil (a raw material that is effective in soothing from Switzerland), Multi Ex BSASM, and others effectively protects the irritated skin. The amino-acid complex, peptide complex and other ingredients deeply nourish the skin and help strengthen skin barrier.

## Can be used safely on sensitive skin

It can be used safely because it does not contain ingredients those can irritate sensitized skin.

## Main components and effects

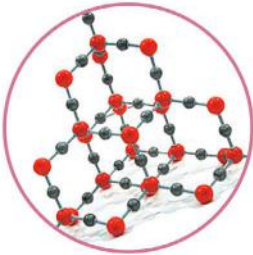

DEFENSIL®

MultiEx BSASM Plus

17 amino acid complexes

7 peptide complexes

Phycosaccharide AIG

Allantoin

### DEFENSIL®

It is an effective ingredient for sensitive skin developed by RAHN, Switzerland. It is a compound ingredient of balloon plant's flower/leaf/vine extract, echium plantagineum seed oil, and sunflower seed oil. It is involved in maintaining the homeostasis of the skin to help manage sensitive skin and improve the health of the skin.

### MultiEx BSASM Plus

MultiEx BSASM Plus is a complex extract consisting of 7 plant extracts that have anti-inflammatory and immune response regulatory effects. It has alleviation and healing effects for atopic dermatitis such as skin dryness, inflammation and scarring.

### 17 amino acid complexes

Amino acid is an ingredient with excellent skin affinity and high absorption rate. It acts on the skin barrier and helps to stabilize the barrier, increases the moisturizing and retention of the skin, and keeps the skin healthy. It has moisturizing properties of the stratum corneum to soften the skin and helps to improve the skin by participating in the collagen activity.

### 7 peptide complexes

Peptides are micro-molecules which can be absorbed into the skin better than other substances and induce faster and more direct effects. In addition to the acetyl hexapeptide-8 (also called as BOTOX-like peptide), the peptide group of palmitoyl oligopeptide, tripeptide-29, copper tripeptide-1 and palmitoyl pentapeptide-4 (also called as collagen peptide) improve the skin elasticity and revitalize the fatigue and droopy skin.

### Phycosaccharide AIG

It is a raw material extracted from kelp algin. It has an excellent soothing effect which helps to care the redness and sensitized skin from the external irritations and promote the improvement of unstable skin barrier.

### Allantoin

Allantoin is a natural ingredient extracted from plants such as oak tree, comfrey root, sugar beet, and wheat. It is suitable for sensitive skin and baby skin as it is hypoallergenic. It strengthens the skin barrier and improves moisturizing function to protect irritated skin and smoothes

※The above is limited to the characteristics of the raw material.

## How to Use

Apply 2-3 times a day to the troubled areas frequently

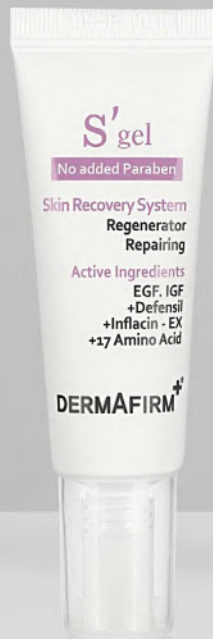

## Recommended for the following people

- Those who are concerned with redness and sensitized skin from the external irritations
- Those who have irritated skin from tattoo or permanent makeup

S' gel

Protect skin with transparent barrier

Intensive care gel that protects skin from external irritations by the thick wearing on the damaged skin

Maintains skin homeostasis

Highly concentrated active ingredients that are involved in maintaining the homeostasis of irritated skin protect and soothe sensitive skin, helping to recover quickly.

Now, apply it instead of wearing bands!

It is an easy-to-apply spot gel type that does not need to be cut and attached one by one. After use, it forms a thin layer to protect the skin from external irritation.

## Before & After Use

[Gender: Female / Age : 35 years old]

▲ After

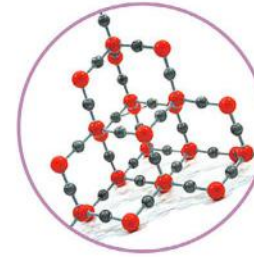

▲ 20 minutes after application  
(Remove after 3 to 4 hours after the thin film formation))

※There may be an individual difference.

X' cream

### Clean and clear deep inside the skin

Ingredients highly effective in whitening such as niacinamide, vitamin C derivatives, clerilys, and melatein-X effectively inhibit the production of melanin and make the skin tone clear.

## Definite intensive whitening management

Intensive whitening cream that is more effective and reliable, with proven ingredients and stable formula

## Main components and effects

Citrus Grandis extract

Niacinamide

Ascorbyl glucoside

Clerilys®

Inflacin -Ex

Melatein-X

### Citrus Grandis extract

It is a component extracted from the peel of citrus grandis fruits (citrus grandis, grapefruit) and it provides tension to the skin by converging action, which helps to manage vitality and elastic skin.

### Niacinamide

It is a stabilized vitamin C derivative that improves dark spots and unevenly discolored skin tones, making the skin clear and cleans from the inside.

### Ascorbyl glucoside (vitamin C)

It is a vitamin C derivative that is resistant to heat, light, and oxidation unlike vitamin C. It inhibits the formation of spots and freckles, and helps whitening by preventing melanin deposition.

### Clerilys®

It is safe new raw material from France that replaces hydroquinone. It is a complex of natural plant ingredients such as hibiscus flower extract, mulberry root extract, and cucumber extract. It helps to brighten the skin tone and provide conditioning to the skin to make a vital and smooth skin.

### Clerilys®

It is safe new raw material from France that replaces hydroquinone. It is a complex of natural plant ingredients such as hibiscus flower extract, mulberry root extract, and cucumber extract. It helps to brighten the skin tone and provide conditioning to the skin to make a vital and smooth skin.

### Inflacin -Ex

A combination of boswellia serrata extract and centella asiatica extract protects and cares the damaged skin and prevents dryness. It is a hypoallergenic ingredient suitable for sensitive skin, helping to improve skin condition and promote healthy skin.

### Melatein-X

Melatein\_X is a new skin whitening agent that inhibits the melanin production of the melanocytes. It has proved much clearer whitening effect than arbutin, which is the existing whitening ingredient, and it has excellent penetration ability and stability because of its similarity with the cell membrane.

※The above is limited to the characteristics of the raw material.

## How to Use

Apply 2-3 times a day to the areas where skin tone improvement is needed.

## Recommended for the following people

- Those who want to receive intensive care for the blemish and freckles on the face
  - Those who need immediate skin tone improvement on the spotted area
  - Those who want to improve the darkened skin tone from UV and others
