Thank you for purchasing our metal tournament case. We wanted to give you a little information on the proper care of the case to minimize any reorder cost to you.

**Bobby Pollitt, PGA**  
President & Co-Owner  
bobby@ptegolf.com

First, please use caution when unpacking and when storing these cases. They are powder coated aluminum, so they will not rust but do require proper care. Please let your staff know to avoid throwing, tossing, or abusing the cases, especially on hard surfaces.

We have included a clear sheet of Lexan to help protect the inside lid of the case. Since it is impossible to know exactly what will be put inside, we recommend you always use this sheet of Lexan inside the case to protect against scratches on the inside lid or logo. This will also keep the items in the compartments from travelling when carrying the case. When you are using the case during an event, the sheet of Lexan simply slides in the slot in the lid of the case.

We provide a one year warranty on the case against manufacturer defects. This does not include normal wear and tear, abuse, or mishandling. If you have an issue, please let us know and we will do our best to resolve the situation.

Again thank you for your support of PTE Golf as we continue to grow and help enhance your image.

Sincerely,

Matt Pollitt  
CEO, PTE Golf
