

Table Covers Care Instructions

“Helping Professionals Look More Professional”

Cleaning & Storage:

- Spot clean with mild soap and water, then air dry. Do not dry clean. Do not machine wash or exposure to high heat.
- Table covers are meant for event use only. The material will eventually fade in the sun, avoid direct long term exposure. Bring in the covers after your events to extend the life of your covers.
- May be pressure washed (avoid embroidery), but air dry off all surfaces to avoid possible mildew.
- Wrinkles may be steamed out with a steamer when needed. Lift table cover away from table first before steaming to avoid melting the PVC backing on the table covers.

Folding & Storage:

1. Lift The Cover off of the table. (Figure 1)
2. Fold each end towards the inside (Figure 2)
3. Lift the top portion of the table up, creating a crease in the middle (Figure 3)
4. Lay cover down and fold top flap over the front (Figure 4)
5. From here, fold the cover over itself until it's uniform (Figure 5)
6. Try to not fold a crease on the logo itself (Figure 5)
7. The final result should appear like this (Figure 6)
8. Ideally, the logo should end up on top however as long as there's no crease on the logo, it works just as well (Figure 6)
