

Customise your ICUS skip

Combi Tipping Skip optional extras

Waste handling made easy with the versatile combi skip attachment. Get the most from your skip with optional extras to improve the efficiency of tasks. Increase the load capacity, secure loads, or move and dispose of them more easily.

Castors

Allow ease of movement around site. Choose rubber or cast iron and braked or unbraked options

Auto-tipping mechanism

Linked to the manual release handle for tipping at high level without the operator leaving the safety of the cab

Standard features:

- 4-way entry base
- Reinforced leading edge and body sides
- Low loading height
- Fully seam welded for retention of fluids
- Painted orange for safety (other colours available)

Zinc-plated heel pin retention

Ensures safe and secure attachment to the forks when moving around the site and during the tipping cycle

Secondary locking mechanism

Mechanical stop to assist release handle to prevent accidental discharge

Mesh sides *

Increase the skips capacity and empty less frequently with bolted on molded mesh sides

** Mesh and lid option cannot both be fitted*

Lidded opening *

Dispose of loose waste material with minimal debris and prevent vermin entering skips
