

TJC 'TWIN JAW' VERTICAL PLATE CLAMPS

The TJC twin jaw vertical plate clamps have been specifically designed for lifting materials with low minimum weight, but large thickness. The main difference between the TJC and the CZ (which is our standard vertical plate clamp) is that the TJC has a unique twin moving jaw arrangement.

NB: The plate surface of the material being clamped must have a hardness level below HRC 30/Brinell 300.
