

CDV - Vertical Drum Clamp

The Tiger CDV-0060 drum clamp has been designed to lift and transport drums in the vertical position.

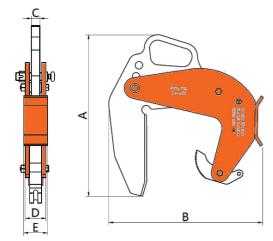

One clamp can be used to lift drums with or without their lids by gripping the rim of the drum. Its lightweight and small overall design makes it ideal for picking up drums that sit tightly on pallets. The centre of gravity of the drum is below the lifting point during transportation.

CPL - Pipe Lifting Clamp

The Tiger CPL pipe lifting clamps are used in sets of three for the vertical transportation of concrete pipe sections with a diameter of up to 2m. The jaw capacity is designed for pipe thickness of 40-120mm for the 1.5t capacity set and 90-220mm for the 3.0t capacity set. Attachment and removal of the clamps from the pipe is extremely easy due to the simple and straightforward design. For concrete according to DIN4034. The capacities shown are based on a set of three clamps.
