

Designed to hang on to the existing forklift carriage to change the carriage to a different 'class' (i.e. convert from Class 2 to Class 3 carriage)

Our adaptor carriages are manufactured from high quality 50D Boron steel, offering high abrasive qualities which greatly reduces the wear along the top rails from the forks sliding back and forth.

Model Ref	Carriage Width (mm)	To Suit Existing Carriage Class	Adaptor Carriage Class	Lost Load Centre (mm)	Weight (kg)
AC2-1000	1000	3	2	60	108
AC2-1200	1200	3	2	70	126
AC3-1000	1000	4	3	70	124
AC3-1200	1200	4	3	70	144

## Features & Benefits

- Designed to allow an existing forklift carriage class to be converted from one carriage class to another, which in turn allows different attachments to be used on the same truck
- Manufactured from high quality 50D Boron steel offering high anti-abrasive qualities
- Produced in any width, providing complete flexibility to your requirements
- CE marked and supplied with all relevant health & safety documentation
