

# Fork Mtd Drum Positioner (FDP)

The fork mounted drum positioner offers effective and safe movement of drums from horizontal to vertical and vice versa.

To pick up a drum in the vertical position: Lower the attachment to the ground so as to support the tines, then simply release the handle via the pull chord. Gently raise the forks until the tines are clear of the ground and are hanging vertically. Approach the drum and lower the tines over it. Now simply reverse the truck slowly while gently lowering the forks until the drum comes to rest on the ground in the horizontal position. This movement will auto-lock the tines, the drum can now be transported.

Model Ref.	Capacity	No. Of Drums	Drum Types	"A" Pocket Length	"B" Fork Spread	"C" Fork Width	"D" Fork Thickness
FDP-1	400kgs	1	1 & 2	900mm	567mm	140mm	60mm
FDPF-1	400kgs	1	1 & 2	900mm	567mm	140mm	60mm
FDP-2	800kgs	2	1 & 2	900mm	567mm	140mm	60mm
FDPF-2	800kgs	2	1 & 2	900mm	567mm	140mm	60mm

Model Ref.	Weight	LLC	C of G
FDP-1	95kgs	165mm	770mm
FDPF-1	106kgs	165mm	850mm
FDP-2	145kgs	165mm	1080mm
FDPF-2	167kgs	165mm	1250mm

Fork Mounted Drum Positioners offer a unique means of manipulating drums from horizontal to vertical and vice-versa without leaving the seat of a fork truck. Completely mechanical in operation, it can be used for transporting drums, loading/unloading vehicles/drum stands and racks. Suitable for use with Steel/ "L" and "XL" Plastic Drums of 210-litre capacity. Stainless Steel Model also available.
