

Designed to hang on the existing forklift carriage to extend the width, which in turn allows for a wider fork spread or to allow four forks to be hung onto the carriage.

Our False carriages are manufactured from high quality 50D Boron steel, offering high abrasive qualities which greatly reduces the wear along the top rails from the forks sliding back and forth.

Model Ref	Carriage Width (mm)	Carriage Class	Lost Load Centre (mm)	Weight (kg)
EWC2-1200	1200	2	60	115
EWC2-1500	1500	2	60	134
EWC2-1800	1800	2	60	155
EWC3-1200	1200	3	70	130
EWC3-1500	1500	3	70	163
EWC3-1800	1800	3	70	196
EWC4-1500	1500	4	80	241
EWC4-1800	1800	4	80	321
EWC4-2000	2000	4	80	385

Features & Benefits

- Increases the width of the existing carriage to allow a wider fork spread setting
- Manufactured from high quality 50D Boron steel offering high anti-abrasive qualities
- Produced in any width, providing complete flexibility to your requirements
- CE marked and supplied with all relevant health & safety documentation
