

Quick Use Guide

Probiotics are a living organism. Most household chemicals are designed to kill bacteria, which will also kill our friendly probiotics. When using any of our products they should only be used in conjunction with other probiotic products.

Protreat Sachets

- For the first application empty your holding tank and rinse with fresh water. Do not add any other chemicals to the holding tank.
- Ensure all chemical based products are removed from your flushing tank

Now that you have eliminated all the nasty chemicals from your toilet system you're ready to become an EcoTraveller

- Add 2L of water for regular ProTreat and 1L for ProTreat Ones.
- Add 1 sachet to the holding tank of your portable toilet

4in1

EcoTraveller 4in1 is an all in 1 probiotic cleaner. It can be used as the Rinse, Tank Cleaner, Bowl Cleaner and as a general bathroom cleaner.

For use as :

Rinse

- Ensure all chemical based products are removed and rinsed from your flushing tank
- Add 100mL of 4in1 and fill the remainder with cold water.

Tank Cleaner

- Add 100ml to the tank. Add 2-3 litres of cold water.
- Close flap and agitate by shaking the tank for 30 seconds and let sit for 5 minutes.
- Empty tank into dump point.

Toilet Bowl Cleaner

- Using the bottle and squirt cap provided
- Squirt EcoTraveller 4in1 around the rim of the toilet and agitate with a brush
- Rinse with water or flush with the rinse tank.

Spray / General Purpose Cleaner

- Using the 500mL EcoTraveller Spray Bottle
- Add 50mL to the bottle and fill the rest with cold water
