

ACRYLITE® SATINICE OPTIMUM LIGHT DIFFUSION

ACRYLITE® Satinice optimum light diffusing acrylic products take advantage of special particles that diffuse light passing through the sheet. These particles, distributed throughout the material, work to eliminate hot spots. Light will be diffused and transmitted differently depending on the grade. The right balance between light diffusion and transmission can soften the light in a room and enhance any environment.

- ✓ **frosted texture throughout**
- ✓ **excellent light diffusing properties**
- ✓ **high light transmission**
- ✓ **abrasion and fingerprint resistant**
- ✓ **easy to fabricate**
- ✓ **enhanced grades available**
- ✓ **30-year non-yellowing warranty on colorless (OD010)**

White

WDO08 DF | 3172

Translucent | up to 65%

Fingerprint Resistant

Frosted

Product Specification ACRYLITE® Satinice optimum light diffusion White WDO08 DF

Available Forms Flat Sheets

Production Method Extruded

Material Acrylic

Masking TP - Poly both sides

Properties Light Diffusing

Optical Properties Translucent | UV Stabilized

Surface Fingerprint Resistant | Frosted

Weatherability Indoor | Outdoor
