

Filtered Air System with Magnet Install

Item # 4877M

Install 2" safety clip here, on all four sides.

FILTERS THE AIR AS IT EXITS THE CEILING DIFFUSER & STOPS DUST AND SOOT FROM COLLECTING ON THE CEILING

New & Improved! Installs easily using 4 magnets.

3-ply filters trap dust and allergens. Attach white side of filters to Velcro (blue side facing in towards the center of the plastic housing). 1 extra set of filters included. Change filters every 3-6 months. Replacement filters available: item # 4877RF

The Filtered Air System with Magnet Install will eliminate the draft while filtering the air, improving indoor air quality. Four-way airflow reduces cold and hot spots while creating a more uniform ambient temperature throughout the room. Hangs only 2.75" down from the ceiling; discreet enough for use in an office, restaurant, hotel or retail setting. Filters trap ductwork pollution particles improving air quality which helps to reduce allergic reaction and illness. Helps prevent dust buildup on acoustical ceiling tiles, maintaining a cleaner appearance. Installs with ease on any 24" x 24" drop ceiling with a T-Bar grid system using 4 powerful magnets. 2 sets of filters are included with each system. Filters last about 3-6 months and replacements are sold separately. NO TOOLS required. All parts included. Outside dimensions: 24-1/2" x 24-1/2" x 2.75"

INSTALL SAFETY CLIPS

Four pieces of a 2" Safety Clip are included with each filtered air system. Install on all four sides, attaching to ceiling grid and outside flange of the Filtered Air System.
