NEW VACUUM

POV-8 SURFPREP PROFESSIONAL ON-SITE VACUUM

Be a Part of the Clean Sanding Revolution

- **HEPA-H Filter System (High-Efficiency Particulate Air)**
Engineered to provide maximum protection from hazardous dust. Captures 99.9% of particles .03 microns and larger. Ideal for many materials (primer, paint, wood, dust, etc.)
- **Self Cleaning**
The POV-8 is equipped with an automatic filter cleaning system to ensure maximum extraction efficiency while sanding in all working conditions. Air-flow passing through the filters is inverted in alternation every 30 seconds to ensure efficient cleaning action. This system allows the operator to continue working without a reduction in the extraction process.
- **Automatic ON/OFF**
Vacuum system automatically activates when sander is turned on. When operator stops using the sander, the vacuum will automatically turn off. This feature saves time and electricity while keeping a quiet work environment.
- **Industrial Tank**
Structure ensures resistance and manageability of movement in all workplaces. Impact resistance tank withstands rough use & chemical exposures.
- **Static Conductive System**
Fully integrated static conductive properties of POV-8 paired with 12' vacuum hose stops static shock due to different climates.
- **Systainer T-LOC**
Compatible with all T-LOC Systainer modular systems. Vacuum can be used as a workstation to store tools, abrasives, and much more.

\$699

SurfPrep POV-8 paired with Systainer for clean sanding and storage.
