DISPOSABLE LID/FILTER ASSEMBLY

DISPOSABLE MIXING CUP

MIX, CONNECT, SPRAY

SO EASY IT'S A SNAP

The *SNAP N FLOW*™ Disposable Paint Cup System from DeVilbiss Automotive Refinishing is an innovative paint system that lets you mix, connect and spray — all with one disposable cup system.

Using the *SNAP N FLOW*™ disposable cup system makes automotive refinishing jobs easier, faster and more efficient. The system:

- Requires fewer steps
- Improves color matching
- Minimizes paint usage
- Creates less mess and quicker cleanup
- Provides easy paint storage options
- Offers greater savings on materials and time

The simplified design of the *SNAP N FLOW*™ system allows painters to measure, mix, spray and store ... all in the same mix cup — providing a significant savings in paint ... and time. The specially designed lids snap on the cup. In a snap, you're ready to spray.

This innovative system creates a constant flow of paint from the cup through the gun. Unrestricted consistent fluid flow gives you the best color matching and more control over your jobs.

SNAP N FLOW™
by DeVilbiss

SIMPLE SYSTEM

Provides a more intuitive, familiar method of mixing and spraying paint

SNAP N FLOW™ significantly reduces the number of components (and steps) needed to complete a job.

- A** The unique chambered lid and venting tube design maximizes fluid flow to the spray gun. Lid sizing is optimized to 15 and 32 ounces — for small and large jobs. Lids with integrated filters are available in 125- or 200-micron sizes.
- B** The 15- and 32-ounce *SNAP N FLOW*™ mixing cups are industry-standard sized and feature flat bottoms for easy stirring.

- C** The easy-connect adapter securely attaches the gravity spray gun to the *SNAP N FLOW*™ lid. Adapters are available to fit a majority of gravity guns from major gun manufacturers.
- D** The sturdy flat lids are used when paints need to be mixed on the shaker. These flat lids are also used for longer-term paint storage.
- E** A shaker adapter is used with the flat lid for shaker mixing.
- F** Special *SNAP N FLOW*™ plugs snap on the cone-shaped lids. The unique design allows the cup and vented lid system to be stored upside down — keeping the filter wet during paint storage.

HOW-TO GUIDE

1 ADAPTER

The first time you use the SNAP N FLOW™ system:

- Install the appropriate SNAP N FLOW™ adapter on your spray gun using an adjustable wrench.

2 MEASURE

To measure your paint:

- Place a SNAP N FLOW™ disposable mixing cup on the mixing scale.
- Add paint components to the cup.
- Do not fill past the cup's "fill line."

3 MIX

Stir or use a shaker to mix your paint.

To use the shaker:

- Place a SNAP N FLOW™ flat lid on the cup and snap it in place.
- Place the SNAP N FLOW™ shaker adapter over the flat lid.
- Place it in the shaker.
- When finished, remove from the shaker.
- Remove the shaker adapter and the flat lid.

Stirring

Shaker Mixing

4 SELECT LID

Select a SNAP N FLOW™ disposable vented lid:

- Match lid size to cup: 15 or 32 ounce.
- Also, when choosing the lid, select from the 125 micron (blue) or 200 micron (clear).

If you don't need a filter for your job, just pull the tab to remove it.

5 SNAP ON LID

Snap the lid on the cup by firmly applying pressure around the lid's perimeter.

SNAP!

6 CONNECT

To attach the spray gun:

- Find the large indentation on the cup lid.
- Position the indentation at "10 o'clock."
- Invert the gun.
- Squeeze the trigger.
- Align the gun's air cap so it's pointing toward "12 o'clock."
- Insert and turn the gun clockwise, making a three-quarter turn until:
 - The gun's adapter is locked into place in the lid.
 - The adapter's lip makes contact with the top of the lid.

DON'T FLIP IT OVER YET!

7 SPRAY BOOTH

Keep the gun and cup inverted while you carry it to the spray booth.

8 AIR HOSE

Connect the air hose, keeping the gun and cup inverted.

9 VENT

Pull trigger to draw air through the lid's vent tube to remove paint from the tube. (You'll see the air bubble inside the cup.) This venting maximizes fluid flow.

10 SPRAY

Flip the gun over and start spraying.

While painting, keep the gun upright. The SNAP N FLOW™ system is not designed to paint upside down.

11 FINISH

- When you're finished or need a refill, unhook the air hose from the gun.
- Invert the gun. Pull the trigger to allow the fluid to flow back into the cup.
- Remove the gun by turning it counter-clockwise.

STORING PAINT

Option 1: Short-Term

- A special plug is included with the lids. Insert this plug into the lid's adapter opening.
- Store inverted so the filter remains wet.

Option 2: Longer-Term

- Remove the SNAP N FLOW™ lid assembly:
 - Place thumbs on back of cup and index fingers under lid edge along front of lid.
 - Press down with thumbs and pry up with index fingers.
 - Rotate cup 180° and repeat, lifting cup off opposite side, and let sit for a second or two.
- Remove the lid assembly and dispose of properly.
- Snap a flat lid on the paint cup and store upright.

REFILL

To refill paint in the middle of a job:

- Open the SNAP N FLOW™ lid assembly as noted in Longer-Term storage, above.
- Temporarily set the lid on an empty cup.
- Measure and mix your paint.
- Reattach the lid assembly with caution.
- Reattach to the spray gun.
