## Finishing Shop Equipment

# Professional Painters' and Wood Finishers' Cabinet Door Drying Racks

#1 Best Seller

A Drying Rack for cabinet doors is something every cabinet shop, painter, and wood finisher needs...

This 50-Shelf Pro Drying Rack is a true workhorse in any shop or job site. Each shelf holds up to 25 lbs and can be rolled to the next production station or out of your way when fully loaded. No need to pull or place parts in any sequence, grab from the top, bottom, or middle to work the way you work. This true space saver takes 200 sq ft of drying surface area and reduces it to just 6 ½ sq ft. Assembles and disassembles easily with just 4 bolts. All steel construction with powder-coated finish ensures years of service.

- Conveniently hold up to 50 cabinet doors in a 6 ½ sqft space
- Easy to assemble and disassemble for storage or transportation
- Keep workshop clutter-free. Easily customized to fit your needs

This item ships in 2 cartons with 2 different tracking labels. Please be aware that the cartons may have different arrival times.

### ProDryingRack TT™

Think of it as the little brother to our flagship drying rack, the PDRTT Pro Drying Rack holds 20 cabinet doors up to 25 lbs each. Position on the counter, on a table, or just on the floor to make the most of your workspace. String 2 together and hold long parts such as crown molding or baseboard. Stores flat and features near “brains optional” assembly with just 4 wing nuts. Perfect for DIYers and professionals alike.

- Conveniently hold up to 20 cabinet doors
- Easy to assemble and disassemble for storage or transportation
- Keep workshop clutter-free. Easily customized to fit your needs

## Finishing Shop Equipment

### ProDryingRack EX™

Our robust and expandable ProDryingRack EX stretches from 20" to almost 60" in width for the larger pieces of your project. Fifteen levels hold up to 60 lbs each. Round, 1" diameter, removable tubes of 30" lock into place with just a turn (no tools). If you need more than the 3" of usable space between the levels, just remove "levels" until you have the room you need.

Clamp levers in the back easily allow the user to expand and contract the rack before loading. With a high-quality, all-metal build, including fully gusseted support, reinforced bottom plate construction and powder-coated finish, the ProDryingRack EX is a true workhorse for any cabinet or woodworking shop.

## Finishing Shop

### Equipment

## ProDryingRack SD™

This metal spinner makes for an even faster setup with fewer parts to pack up. Set it up exactly as you would with the regular PSDR spinner system, minus the wooden dowels.

The PSDR Series (SD) is an integrated system designed to paint and dry cabinet doors in a vertical orientation with the least amount of effort and space. Parts hang for spraying of all sides in one step.

Hang doors by common cup hooks, or use our new EFC Hinge Hooks for completely unmarred surface results (sold separately). The doors then hang on the spinner assembly which is designed to give the painter complete control of the hanging part. Heavy-duty metal hangers eliminate the annoying and costly failure of wooden clothes hangers. 18 feet of drying line allows tight spacing of 50 drying doors because the custom hanger hook radius matches the drying pole so the parts don't spin.

#### Included:

- 9 six-foot poles, 1 spray tube, 6 bases, joints, and hardware to build the spraying and drying stands.
- 50 Standard Hangers
- 1 Spray Holder
- 1 Spinner
- 3 Carry Bags
