

Dynamic Flow Technology™

Dynamic Flow Technology™ harnesses the ambient air around the aircap allowing the Sagola 4600 spray gun to provide a flawless finish even at lower working pressures.

DFT™
Dynamic Flow Technology

DFT™ Gives you:

- Greater fan stability.
- Superior atomization.
- Uniform fan from top to bottom.
- Less bounce back, less overspray.
- A more precise application with easier overlapping.
- Less painting defects such as shadowing, patch coats and striping.
- An even paint distribution - ideal for difficult base colours such as metallics, silvers, pearls.

The Sagola 4600 provides a more even and uniform paint distribution, from top to bottom. This makes it ideal for difficult base colours such as metallics, silver, and pearls. It also minimises common paint defects like shadows, patch coats, and striping.

All of this is achieved while using less paint, less air, and less time, ultimately lowering your costs and boosting your profits.
