

5000X

AIR PURIFYING FILTERS

5000X

Code 10730204

- Air purifying filter.
- Pressure regulator and pressure gauge.
- Double air outlet.
- Semi-automatic draining system.
- Sinterised brass filter (40 microns).
- Water, oil and impurities.

5100X

Code 10730202

- Air purifying filter.
- Pressure regulator and pressure gauge.
- Double air outlet.
- Automatic draining system.
- Sinterised brass filter (8 microns).
- Water, oil and impurities.

5200X

Code 10730304 (Double stage)

- Sinterised brass filter (8 microns) + Purifying Regulator Filter with Coalescent filter (0.01 microns).
- Pressure regulator and pressure gauge.
- Double air outlet.
- Automatic draining system.
- Retention of water and impurities. (99%).

5300X

Code 10730305 (Triple stage)

- Sinterised brass filter (8 microns) + Purifying Regulator Filter with Coalescent filter (0.01 micron) + Wide surface active charcoal filter.
- Maximum filtration efficiency.
- Double air outlet.
- Retention of water, oil, organic vapors and odors. (99%).

Air assisted regulator

Filter elements of high section

Maximum quality of manufacturing in materials and mechanized

Special waterbase paint and HS

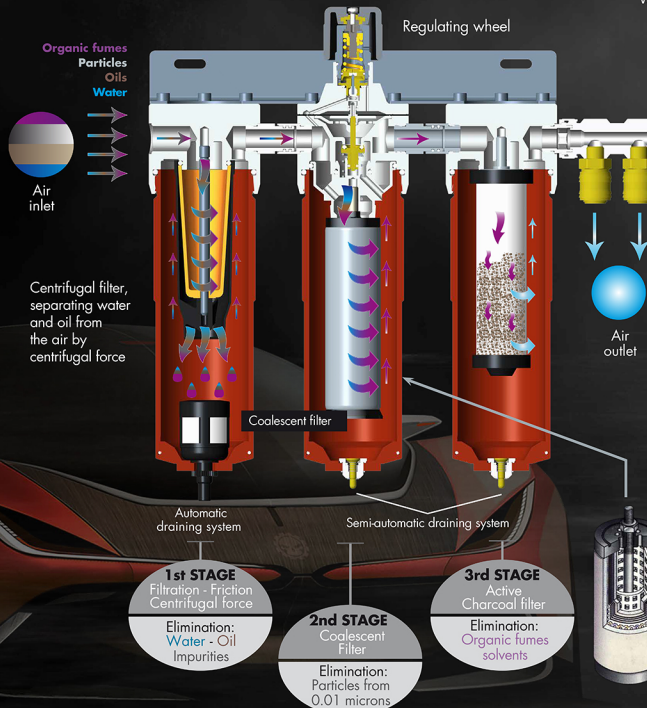

Maximum flow 2500 L/min, outlet 2 sprayguns

Maximum softness of working and precision

Maximum Quality in the air filtering

Quick connectors with stainless steel mechanism and joints free silicones

Life control filters easy-to-read dynamic device

MADE IN SPAIN
