Looking for a hands on activity, fun gift, or environmentally friendly fundraiser? Look no further. Seed balls are easy to make, fun for kids, and can be made entirely from recycled products!

**Plantable paper?!**

**WHAT TO PLANT?**
- Daisy
- Sunflower
- Poppy
- Basil
- Aster
- Dill
- Oregano
- Parsley

**SUPPLIES:**
- Recycled paper
- Seeds
- Water
- Food processor
- Bowl
- Strainer
- Tray

1. **Tear it up**
   - Tear or shred the paper into small pieces. Place them in a bowl of water to soak for 15 minutes.

2. **Chop chop**
   - Process the soaked paper in small batches to make your "dough". Strain out excess water until dough does not drip.

3. **Knead the dough**
   - Break dough off into small portions and knead seeds in. Aim for 20 seeds per ball. Set on tray once finished.

4. **Let it dry**
   - Keep seed balls inside, out of the sun until they are dry. When you are ready, throw them in the ground and water!

Note: Drying will take a while! Don't put seed balls into the oven as that will kill the seeds and stop them from growing. For fun shapes you can press paper dough into a shaped ice cube tray.
