HELP PLANT 1,000,000 TREES AFTER CALIFORNIA’S WORST EVER WILDFIRES

Nearly 2 million acres of California forest was destroyed by fires in 2018, more than any other year on record.

$3.5 BILLION
Cleaning up from the 2018 fire season alone cost state and federal authorities upwards of $3.5 billion.

HOW IT WORKS
We send donations to our amazing reforestation partners across California, who are working hard to restore land devastated by wildfires. We work with state forestry, conservation groups, and Cal Fire.

WHY HELP?
California’s iconic forests have been through a lot recently. After 5 years of drought and a bark beetle infestation, the record breaking wildfire season in 2018 ripped through 1.9 million acres – an area larger than Delaware.

WHAT YOU GET
- A powerful CSR story
- MTC badge for your website
- Your company logo on our MTC webpage
- Access to our logos and photos
- Updates and photos on the projects you’re supporting
