4. FIRST-AID MEASURES.

- Description of first aid measures.
 - Inhalation:** If symptoms are experienced, remove source of contamination or move victim to fresh air. In case of breathing difficulties administer oxygen. If symptoms persist, obtain medical advice immediately.
 - Ingestion:** Have victim rinse mouth thoroughly with water. "Do not induce vomiting". Immediately give large amounts of water. If vomiting occurs, rinse mouth and repeat administration of water. Obtain medical advice. Never give anything by mouth to an unconscious or convulsing person.
 - Skin contact:** After contact with skin, wash immediately with: Water. Subsequently wash again with: Water and soap. Take off immediately all contaminated clothing. If irritation persists, seek medical attention.
 - Eye contact:** In case of eye contact, keep eyelid open and flush with plenty of water for 15 minutes. If irritation should persist subsequently consult an ophthalmologist. Protect the eye that is not injured.
- Most important symptoms and effects, both acute and delayed.
 - Inhalation:** May cause irritation to the respiratory tract.
 - Ingestion:** Harmful if swallowed. May cause gastrointestinal irritation, nausea, vomiting and diarrhea.
 - Skin contact:** May cause skin irritation. Repeated exposure may cause skin dryness or cracking.
 - Eye contact:** Causes serious eye damage. Symptoms may include discomfort or pain, excess blinking, and tear production, with marked redness and swelling of the conjunctiva. May cause burns.

5. FIRE-FIGHTING MEASURES.

- Suitable extinguishing media: Water sprays jet, water mist, foam, and carbon dioxide (CO2).
- Unsuitable extinguishing media: Full water jet.
- Special hazards. In case of fire may be liberated Sulphur dioxide (SO2) and Sulphur trioxide (SO3).
- Combustion decomposition products: Sulphur dioxide (SO2) and Sulphur trioxide (SO3) are generated.
- Advice for firefighters: Heating of container(s) will cause pressure rise with risk of bursting and subsequent explosion gives of toxic and irritant fumes when heated or burning. The vapor may be invisible and is heavier than air. It spreads along the ground and may enter sewers and basements. Keep container(s) cool with water. Extinguish with water fog (spray). Do not use water jet to extinguish. Use water spray to knock down fire fumes if possible. Avoid unnecessary run-off of extinguishing media which may cause pollution.
- Protection during firefighting: Wear full firefighting turn-out gear and respiratory protection.

6. ACCIDENTAL RELEASE MEASURES.

- Personal precautions: Use personal protective equipment (see section 8).
- Environmental precautions: Stop leaks if possible. Contain spillage by any means available. Cover drains. Do not allow to enter into soil/subsoil. Do not empty into drains or the aquatic environment.
- Methods and material for containment and cleaning up: Sweep spilled substance into containers. Carefully collect remainder, and then remove to safe place. Dispose according to regulations (see section 13).

7. HANDLING AND STORAGE.

- Precautions for safe handling.
 - Avoid spilling, skin, and eye contact.
 - Use mechanical ventilation in case of handling which causes formation of dust.
 - Avoid inhalation of dust.
- Conditions for safe storage, including any incompatibilities:
 - Keep in the original container.
 - Keep in a fresh, dry, and vented place.
 - Store away of strong acids or alkaline substances.
 - Store away of oxidizing or reducing materials.
 - Keep the container free of leaks.
 - Store away from hot surfaces and risk flame places.

8. EXPOSURE CONTROL / PERSONAL PROTECTION.

- Exposure limits values.

Ensuring control of process conditions. Replacement air supply to supply air continuously removed. Provide showers and eyewash stations.
- Personal Protection:
 - Eye Protection:** Safety goggles are recommended.
 - Hand protection:** Natural rubber gloves are recommended. Wash hands and face before eating, drinking, or smoking.
