

How to Incentivize Bixis Using Spells

The activity after Spells is called Bonding. This is when a Bixi is more formally bonded with a fantastical creature of Anaes. This Bonding is the final piece of incentivization Guardians need for Spells to work correctly.

After a Spell is created and a Bonding occurs, you will receive a Creature Tracker sheet.

Each creature a Bixi can bond to has various slots that need to be filled in each of the 8 Hakim categories for the creature to be playable in the following week.

Rules:

- Only Hakim categories that were marked with an X during the Spell creation process can be filled when Bixi does that specific activity.
- The amount each category is filled determines how strong and able the creature will be the following week.

- More than 1 Spell can be used to fill up a bonded creature's slots. This is highly recommended.
- Bixis may be bonded to as many creatures as they are able to maintain with the amount of activities they do.

Reporting

The method for reporting on the Creature Tracker to the Grey Tavern will be launched by the end of June 2022.

The reporting will be used to help us convert what Bixis have recorded on the Creature Tracker into game numbers for the following week.

The reporting will also be an opportunity for Guardians and Bixis to talk about:

- The activities Bixis participated in.
- What other activities a Spell might need to be created for so a Bixi can better fill the slots for their creature.
- If you've done the Complex Spell sheet, how sick the creature is going to be the next week and why.
