Bedroom

At the end of an exhausting day, all you want is to lie on your comfy bed. A bedroom is a space at home where a person feels the most relaxed. Your whole fatigue should end on just entering the bedroom, due to the effect of its interior decor. Besides a source of warmth for an ambiance, rugs are the perfect décor element to the entire setting.

If you are looking for the best options of rug categories, then visit <https://arteverk.com/>. It can be a tricky decision to find a floor covering that adorns your space exactly as you want. If you feel like something's missing in your bedroom, then placing a rug can be a good idea, though.

Now you would be thinking, how can you pair a rug? As every ambiance has a different color scheme, furniture setting, space, and arrangements, etc. Don't have an idea about the pairing of rugs? Then no worries. You can have an expert opinion from the Arteverk consultation. Home décor ideas, as a bonus point, are also provided to customers.

Bedroom

1.

If you have a large or medium-sized bedroom, you can place 3/4th of the rug under the bed.

2.

The edges of the floor covering can be matched or contrasted with the foot of the bed. In case you dislike bare or empty floors

3.

You can place a runner rug on the sides or in the front of the bed if you have a small bedroom.

Early in these cold mornings, when you wake up and sit at the edge of the bed, the idea of putting your feet on the cold floor doesn't seem good enough. A rug placed under the bed is a good alternative. It has several benefits. First, it makes the bedroom look like it's spacious. Second, you don't have to bear cold floors. Enjoy standing barefoot on the rug without getting your feet dirty or cold.

home review

You can also place a rug half under the bed and half in front of the bed. If a puffy or couch is in the front of the bed, then the rug under it would be a better choice.

You can place a rug on the side of the bed or under the side table. The pairing of a rug in a bedroom is directly proportional to space, furniture arrangement, and color theme.

Kitchen

Placing a rug in your kitchen seems like a little irrelevant choice. But, in reality, the kitchen is one of the most important spots at home. It is a place where a person spends a considerable amount of time. Whether preparing food or washing dishes, the kitchen is a space occupied by you, most of the time. You can give your kitchen a luxurious feel from the collection of our runner rugs.

It may not be the first place to appear in mind when you think of decorating with a rug. However, indeed it is the heart of your home. So, practically it should have an element of attractiveness and luxury to make you feel happy whenever you are in this home area. They are best suited for a kitchen space. https://arteverk.com/shop/?filter_standard-size=runners&query_type_standard-size=or

home review

Most kitchen cabinets have neutral colors that give a dull look to the entire setting. To enhance the decorative style, you need rugs of bolder colors to create harmony with the theme. These bright colors would also be convenient to hide different spills and stains. You can place a rug in multiple spaces in a kitchen. Place it under the table or front of the sink, wherever you like. You need to consider the size of your kitchen while making a purchase.

If the space is large enough, you should go for a rug that can cover a large part of the kitchen and a smaller one for a smaller area. It should pair with the entire environment of the kitchen together with cabinets and floor.

1.

A rug protects the floor. Whether marble or wooden, the floor covering protects it from damage and scratches.

2.

It protects the dishes. If any delicate glass dish falls on the floor mistakenly, it is safe from breakage. It will fall on the rug and wouldn't break.

3.

Walking on a rug will give you a sense of softness and comfort. It will reduce fatigue and exhaustion while doing household chores.

4.

It can reduce the noise of the footsteps. So, you would not be annoyed anymore.

5.

The non-slippery floor will reduce the chances of the foot slipping.

Some of the benefits of placing a rug in your kitchen are as follows:

1.

First of all, you have to think of the reasons to place a rug in your kitchen. So, that you can make a wise choice

2.

Take the measurements of the space in the kitchen.

3.

Choose the material that best fits the setting

4.

Select the size, color, and style of the rug.

5.

The interior decor of the space and the floor covering should go well with each other.

Living room

Revive the sophistication of your living room by Arteverk. Rugs can be a game-changer for the entire look of your room. One thing that can adorn your living room is a rug. It will prove to be one of the best choices. Placing it between the seating area or the conversation area is a good idea. You can also sit down on the rug if you don't feel like sitting on the couch. After all, mood changes and a pleasant décor evokes positive emotions.

Sometimes a room without a rug looks like a person without shoes. Shoes complete your outfit. Likewise, rugs give the room a finishing touch. Outshine the luxurious impact of your living room. You can place it in multiple spots. In the center of the living room with the sofas and chairs on the rug is a good option. It will create a visually aesthetic look. Most living rooms have rugs. You can have a look at a few of Arteverk rugs. Acknowledge their importance in a living room.

1.

A bulky rug is not a preferable choice. So, carefully choose the rug considering the texture of the space.

2.

Don't use too dark or screaming colors to attract attention. Color choice is one of the necessary elements in a home décor plan. The most essential and tricky thing is to create a softer look.

3.

Darker colors need more texture to reduce dullness. Pairing with the rug is the best alternative ever!

to-do list

4.

If you have a large living room area and a large rug, place it in the center. In this way, it will be the center of attraction.

5.

If you have a large space and a small rug, then place it between the sofa layout. To create a breathing space for your feet, you can keep the distance between the edge of the sofa and the rug.

Cleaning a rug, not a problem

Arteverk floor coverings can last a lifetime if they are maintained and cleaned daily or from time to time. The first step is to remove the dirt on the rug with a vacuum cleaner on both sides, front, and back. Add soap/detergent into the water.

Do not use hot water because it may shrink the fibers of the rug or fade the color. Apply this solution on the corner to test if this detergent fades the color or not. Then thoroughly apply to the rest of the surface.

Clean it using a sponge or a brush until the detergent runs deep into the rug. Wait 15 to 20 minutes. Rinse thoroughly with a garden hose so that all soap washes out.
