## ***CF2 Install Modifications for 2017+ Milwaukee Eight Harley Davidson***

1. During the installation process of the CF2 Performance Clutch, modifications to the outer primary will be necessary.

2. Remove the primary cover and make sure to clean of an excess oil.

3. Circled in red, portion will need to be grinded will be right below the bottom of the derby cover opening.

4. This area will need to be clearance by using a Dremel or angle grinder of your choice.
  - a. Please use the pictures as a reference to help make changes.

5. Once the primary cover is modified the clutch may now be test fitted.
6. To verify clearance, test by using the clutch to disengage and engaged the clutch. The CF2 pressure plate should now be able to clear the newly modified primary cover.

***Any Questions regarding installation, please email or phone call.***
