

Individual Emergency Water Purifier

# AIRCREW SURVIVOR

Storage, carriage, and purification of drinking water from contaminated sources...

...for aircrew in  
SERE and  
Pararescue  
operating  
environments

Exceeds US EPA standard requirements for removal of  
☠ bacteria ☠ viruses ☠ parasitic protozoa and harmful chemical contaminants  
including ☠ metals ☠ pesticides ☠ volatile organic compounds

# AIRCREW SURVIVOR

## Why select the Aircrew Survivor?

- State-of-the-art high specification MAD® (Mechanically Advanced Disinfection) purification technology - already used in fast jet and other aircrew survival sets - combined with three decades experience of solid engineering design and manufacture
- Advanced purification media permits the removal of both microbiological and chemical contaminants in water
- Meets and exceeds the level of performance required by the US EPA *Guide Standard and Protocol for Testing Microbiological Water Purifiers* for the removal of bacterial, viral and parasitic protozoan pathogens
- Tested to US standards for the successful removal of over 100 harmful metals & chemical elements, pesticides and VOCs in water
- NO chemicals additives required, and NO wait time
- NO handles/winders or moving parts, NO tools, NO batteries, and NO field maintenance required
- Fail to safe design
- Use on rivers, creeks, streams, lakes, ponds, drains and other standing or stagnant water in SERE operational environments
- Ideal for wound irrigation in emergencies
- Ergonomically designed for rapid water collection and use on the move, with minimum pressure required to draw water through the purifier
- Compact and lightweight, fits in airframe survival packs. Total system weight is only 6.6oz (188g)

Survivor InLine Purifier. Tough ABS plastic case. Color: Black. Water purification capacity: up to 200 gals. (750 litres)  
 Dimensions: ~4.72" (119.8mm) L x ~2.05" (52mm) Dia. Weight: 2.65oz (75g).  
 Operational range from 32°F (0°C) to 122°F (50°C)

Multicam carriage case with webbing for additional attachment

Zippered side access to reservoir and purifier

Polypropylene pop-top mouthpiece with neoprene covered hose

System weight (reservoir empty): 24.7oz (~700g)

Front filler cap for water collection

Top opening reservoir for water collection (strong twin snap and Velcro-secured folding seals ensure water security)

105.6 fl. oz (3 litre) water capacity, tear and puncture resistant Armour Weave Reservoir, with FDA approved antimicrobial lining to prevent bacterial growth.
