**MEET THE FACE
BEHIND THE BRAND**

Lilian van Zuylen

Lilian van Zuylen, CCO at TISENTO, reshaped the way we look at jewellery. More than twenty years ago, chic investment pieces were reserved for upper-class ladies. Once TISENTO started doing things differently, the label proved all doubters wrong.

Always drawn to the artistic culture, arts continue to inspire her today.

The contemporary traits of the designs derive directly from her admiration of the modern arts. However, the base inspiration of the brand's creations are always a reflection of classic shapes and art. TISENTO designs are immediately recognizable by their mix of classic shapes with modern twists and feminine energy.

MEET TI SENTO:

MODERN CLASSIC JEWELLERY

[Modern] - adjective
relating to, or characteristic of the present

[Classic] - noun
a work of art of recognized and established value

TI SENTO *always draws inspiration from classic items, but it's power lays in making the classic items modern. The modern classic style is intertwined in our entire branding. Our base is always classic, but we give everything we do a modern touch.*

@TISENTOMILANO #MODERNCLASSICS

With summer approaching, there is something in the air. I am talking about a vibrant feeling that is hard to put in words, but I am sure you know what I mean. This energy, together with a reclaimed summer of love, has been the collection's main source of inspiration.

And if you think of love, you probably think of Paris. Romantic nights.

DESIGNER'S

NOTE

fancy holidays, stylish Parisiennes, and the world's best museums: the city has a lot to offer. While brainstorming with the creative team, we concluded that the love that is in the air in Paris does not only apply to romantic relationships; it appeals to lifelong friendships and family ties as well. All kinds of love inspired and made us move to a place full of energy where happy memorable moments are created. I sincerely hope this collection inspires you to make these kind of memories that last while celebrating love in all its forms. Happy summer.

Love, Lilian

“It started with a *KISS*”

RINGS

STACKING THE LOVE

Endless combinations to create a personal look. We have designed a wide variety of sterling silver rings with platinum, gold and rose gold plating to create that personal look. Both classic and contemporary. After all, opposites attract. On that note, we think you can never have enough rings. Whether you love to wear them simultaneously; or occasionally; rings are the ultimate provocation of daily joy. On top of that, the look of your hands says more than a thousand words - so you better decorate them well.

ALL OUR RINGS ARE AVAILABLE IN SIZE 48 UP UNTIL 62

Endless combinations to create a personal look. We have designed a wide variety of sterling silver rings with platinum, gold and rose gold plating to create that personal look. Both classic and contemporary. After all, opposites attract. On that note, we think you can never have enough rings. Whether you love to wear them simultaneously; or occasionally; rings are the ultimate provocation of daily joy. On top of that, the look of your hands says more than a thousand words - so you better decorate them well.

PENDANTS

MOST PENDANTS COME WITH A DELICATE SILVER NECKLACE

Create a unique look by combining multiple necklaces in different lengths, materials and / or thickness. Style a playful pendant with timeless pearls. After all, opposites attract.

CLIP EYES

To create the ultimate look, TISENTO pendants are designed with a clip eye. Clip eyes allow for endless mixing and matching. Thanks to this special design, our pendants can open & close and can be worn on any necklace. Allowing to create multiple design combinations by mingling different chain lengths, or clipping the pendants to pearl or bead necklaces.

VISUAL MERCHANDISING

VISUAL MERCHANDISING COMPONENTS

By installing this visual merchandising package you will optimise the presentation of TISENTO in store.

MERCHANDISING SUGGESTIONS

Pyramid:
Display the elements as much as possible in a pyramid shape and leave sufficient room for a clear view of the back plate visual.

Key pieces:
Position the key pieces as much as possible in the centre of the display.

Grouping:
Try to work in pyramid shaped groups of three, viewing from the front to back.

PRODUCT INFORMATION

JEWELLERY

Over the years, TI SENTO has raised the bar for silver jewellery. We offer the highest quality jewellery at an acceptable price: our designs are complete in both appearance and wear-ability. Every detail is there to beautify and exceed customer's expectations. This applies to every item and every element in our collection, from our attention to the small details, to the hand setting of the stones and of course, the selection of the materials we work with.

Material - Sterling silver (925)

All TI SENTO jewellery is made with Sterling silver (925). This means 92.5% is pure silver and 7.5% alloys. The higher the percentage of silver, the softer the product will be. In order to prevent damage and breakage, ear jewellery and locks are given an extra addition of a little steel. All pieces designed with linking parts are soldered on all connecting elements. Bracelet locks are especially designed to remain more solid over time. Product informatie

TREATMENTS

Platinum plated

To give the silver an extra shine, all jewellery is platinum plated. The platinum plating also provides an extra protection against scratching and natural discoloration. For some jewellery pieces TI SENTO uses black coloured rhodium or ruthenium to enhance the design.

Gold plating

Several items in the collection are yellow or rose gold plated. The - 18 carat - gold layer is 3 microns thick. As TI SENTO is a silver jewellery brand, gold plating is used as a design element, so the plating is applied on the silver. To complement the colours of stones or the overall design, details such as settings and prongs can be gold plated as well.

As the plating is a thin layer, just like rhodium, it might fade or disappear in time. Usage of certain medicines by the wearer or bringing the jewellery into contact with water and soap may accelerate this process.

SETTINGS

Bezel / closed setting

The stone is set in a completely closed set case. This is a setting method which embraces a stone and holds it securely in place. It is one of the oldest techniques and remains an excellent method to protect both the girdle (middle) and the pavilion (bottom) of a stone from chips and scratches.

Claw / prong setting

The stone is set by small claws. Rounded in the shape of a bead, the claws are bent over and shaped, holding the stone in place. This is the most common method that can, for instance be, found in solitaire engagement rings.

Pavé setting

A method of setting stones next to each other so that an entire surface is covered by small stones. This creates a uniform and glittering piece. The pavé setting is handset by diamond setters.

Gallery / fretwork

This is the decoration on the back of the set case. The more open the gallery design is, the more light will fall on the stones. Transparent stones, such as Zirconia in a brilliant cut, need a closed set case with a small opening in the middle to let the light through.

TI SENTO changes the pattern of its gallery for each new seasonal collection.

STONES

Cubic Zirconia (CZ)

The stones that are often set in TI SENTO jewellery are Cubic Zirconia. This is a synthetic stone made out of natural material. Zirconia is relatively hard. It measures 8 on the Mohs scale (diamonds measure a 10) and has a triple A quality and clearness. Cubic Zirconia is available in many colours and can be cut in extremely sharp facets.

Pearls with a crystal core

TI SENTO uses pearls with a crystal core in its designs. The pearls combine the quality of a perfect crystal core with the beauty of a pearl coating, giving the pearls a flawless, silky smooth surface. The weight of these pearls is similar to natural or cultured pearls and the sensory perception allows these pearls to adapt to the skin's warmth like real pearls. The crystal pearls are also less likely to scratch and change colour.

Synthetic crystal

Synthetic crystal is made of material with the same features as crystal. It is softer than Cubic Zirconium and measures 6-7 on the Mohs scale. Because of the variety in colours available and its hardness, many TI SENTO designs are made using this stone.

Mother-of-pearl doublet

This stone is made up of two layers: the base consists of a pearl layer topped with a second layer of synthetic crystal.

Veined stone

This type of stone has an organic structure in a given colour that gives it a veined marble type of look. Each cut stone is therefore unique in its pattern.

PRODUCT CARE

Here are tips on how to take care of your TI SENTO jewellery

Wear

Put your cosmetics on first and your jewellery on last to avoid damage caused by products like make-up, perfume and hairspray.

Care

Take off your jewellery when using cleaning products including soaps. Avoid contact with hard surfaces. Leave your jewellery at home while working out or when heading to the beach.

Clean

Use a jewellery polishing cloth to clean your silver pieces.

Store

Store your jewellery individually in a box or jewellery pouch. Place it in an area with low humidity.

WARRANTY

Please find our warranty conditions online at <https://www.tisento-milano.com/pages/warranty-repair>

PRODUCT INFORMATION

SIERADEN

In de afgelopen jaren heeft TI SENTO het niveau van zilveren sieraden verhoogd. We bieden de hoogste kwaliteit sieraden voor een acceptabele prijs; onze ontwerpen zijn compleet in zowel aanzicht als draagbaarheid. Ieder detail is er om te verfraaien en de verwachting van de klant te overtreffen. Dit geldt voor ieder sieraad en ieder element in onze collectie, van onze aandacht voor de kleine details tot de hand gezette stenen en uiteraard, de keuze van materialen waar we mee werken.

Materiaal - Sterling zilver (925)

Alle TI SENTO sieraden worden gemaakt van Sterling zilver (925). Dit betekent dat 92,5% puur zilver is en 7,5% bijzetmetalen. Hoe hoger het percentage zilver, des te zachter zal het product zijn. Om beschadigingen en breuk te voorkomen, hebben oorsieraden en sluitingen een toevoeging van een beetje staal.

Alle sieraden bestaande uit schakels zijn gesoldeerd op de verbindingselementen. De armbandsluitingen zijn speciaal ontworpen om gedurende lange tijd stevig te blijven.

BEHANDELINGEN

Platina

Alle sieraden worden afgewerkt met een laagje platina, waardoor het zilver meer glans krijgt. Bovendien geeft platina extra bescherming tegen krassen en helpt het tegen de natuurlijke verkleuring van zilveren sieraden. Voor enkele sieraden gebruikt TI SENTO ook zwartkleurige rhodium of ruthenium, om het ontwerp beter uit te laten komen.

Vergulden

Diverse sieraden in de collectie zijn geel- of rosé goud verguld. De gouden laag - 18 karaat - heeft een dikte van 3 micron. Ook al blijft TI SENTO een zilveren sieraden lijn, vergulden wordt gebruikt als design element en daarom aangebracht op het zilver. Om de kleuren van stenen en het ontwerp beter uit te laten komen, kunnen details als de zetting of de zetpootjes ook verguld zijn.

Omdat vergulding - net als rhodium - een dunne laag is, kan het na verloop van tijd vervagen of verdwijnen. Het gebruik van medicijnen door de drager of het in contact brengen van de sieraden met water of zeep, kan dit proces versnellen.

ZETTINGEN

Gladomzetting

De steen is gezet in een compleet gesloten zetskast. Dit is een zetmethode, die de steen volledig omringt en veilig op zijn plek houdt. Het is een van de oudste technieken, maar blijft een uitstekende manier om zowel de rondst (middel), als de paviljoen (onderste helft) van de steen te beschermen tegen spaanders en krassen.

Chaton zetting

De steen is gezet door middel van kleine pootjes. De basis is afgerond naar de vorm van de steen, de zetpootjes worden hierover gebogen en gevormd om de steen op de plaats te houden. Dit is de meest voorkomende hedendaagse setting.

Pavé zetting

Een methode waarbij stenen dicht bij elkaar gezet worden, zodat het gehele oppervlak bedekt is door kleine steentjes. Hierdoor ontstaat een gelijkmatig en glinsterend stuk. De pavé zetting is hand gezet door diamantzetter.

Gallery/ fretwerk

De decoratie op de achterkant van de zetskast. Hoe meer open deze decoratie is, hoe meer licht op de steen zal vallen. Alleen transparante stenen, zoals briljant geslepen Zirconia, hebben een gesloten zetskast nodig, met maar een kleine opening in het midden om het licht door te laten.

TI SENTO verandert voor ieder nieuw seizoen het decoratiepatroon van de achterkant van de zetskast.

STENEN

Cubic Zirconia (CZ)

Vaak zijn de stenen die in TI SENTO sieraden worden gezet Cubic Zirconia. Dit is een synthetische steen, gemaakt uit natuurlijke materialen. Zirconium is relatief hard, 8 op de schaal van Mohs (voor diamanten is dit 10), en heeft een triple A kwaliteit en helderheid. Cubic Zirconia is verkrijgbaar in vele kleuren en kan in extreem scherpe facetten geslepen worden.

Parels met synthetisch kristal kern

TI SENTO gebruikt Parels met synthetisch kristal kern in haar ontwerpen. De parels combineren de kwaliteit van een perfecte kristallen kern met de schoonheid van een parelcoating, wat de parels een perfect, zijdezacht oppervlak geeft. Het gewicht van deze parels is vergelijkbaar met echte of gekweekte parels en door de gevoelskenmerken passen deze parels zich aan de gevoelswarmte van de huid aan, net als echte parels. Bovendien zijn deze parels minder gevoelig voor krasjes of kleurverandering.

Synthetisch kristal

Synthetisch kristal is vervaardigd van materiaal met dezelfde kenmerken als kristal. Het is zachter dan Cubic Zirconium, 6-7 op de schaal van Mohs. Vanwege de vele beschikbare kleuren en de hardheid, worden veel TI SENTO ontwerpen gemaakt met deze steen.

Parelmoer doublet

Deze steen wordt gemaakt uit 2 lagen: de basis bestaat uit een laag van parelmoer met daarop een tweede laag van synthetisch kristal.

Geaderde steen

Dit type steen heeft een organische structuur in een bepaalde kleur die het een geaderde look geeft. Elke geslepen steen is daarom uniek in zijn patroon.

PRODUCT VERZORGING

Draag het!

Breng eerst je cosmetica aan en als laatst je sieraden om schade te voorkomen door producten zoals make-up, parfum en haarlak.

Zorg ervoor!

Doe je sieraden af als je schoonmaakproducten zoals zeep gebruikt. Vermijd contact met harde oppervlakken. Laat je sieraden thuis wanneer je sport of op weg bent naar het strand.

Maak het schoon!

Gebruik een juwelen poetsdoek om je zilver op te poetsen.

Bewaar het!

Bewaar uw sieraden afzonderlijk in een juwelen doosje of een sieraden zakje. Plaats het in een ruimte met een lage luchtvochtigheid.

GARANTIE

Onze garantievoorwaarden vindt u online op <https://www.tisento-milano.com/pages/warranty-repair>

INFORMATION DU PRODUIT

BIJOUX

Au cours des années, TI SENTO a haussé ses standards de bijoux en argent. Nous offrons la plus haute qualité de bijoux en argent à un prix très acceptable; nos designs sont complets et agréables à porter. Chaque détail est créé pour rendre beau et dépasser les attentes. Cela est valable pour chaque pièce de notre collection. Nous accordons beaucoup d'attention aux petits détails et sertissons à la main les pierres. Nous sélectionnons avec soin les matériaux avec lesquels nous travaillons.

Matériaux - Argent fin (925)

Tous les bijoux TI SENTO sont réalisés en argent fin (925). Cela signifie qu'il y a 92,5% d'argent pur et 7,5% d'alliages.

Plus le pourcentage d'argent est haut, plus le produit sera doux. Afin d'éviter tout dommage ou rupture, les boucles d'oreilles et fermoirs sont renforcés à l'acier pour les rendre plus solides. Tous les bijoux sont composés de maillons soudés à toutes les connexions. Les fermoirs des bracelets sont spécialement conçus pour rester tout aussi solides au fil du temps.

TRAITEMENTS

Plaquage au platine

Pour conférer à l'argent encore plus de brillance, tous les bijoux sont fini avec une couche de platine. Le plaquage au platine apporte une protection supplémentaire contre toute éraflure ou décoloration naturelle. Pour certaines pièces, TI SENTO utilise du rhodium noir ou du ruthénium pour mettre en valeur leur design.

Plaquage en or

De nombreux articles de la collection sont plaqués or jaune ou rose. La couche or - 18 carats - a une épaisseur de 3 microns. Naturellement, chez TI SENTO l'argent fin est toujours le matériau de base, de cette manière le plaquage en or n'est qu'un élément de design et il est appliqué sur l'argent. Pour compléter les couleurs des pierres et le design final, des détails comme des montures et des griffes ont aussi été plaqués or.

Comme le plaquage n'est qu'une fine couche, tout comme le rhodium, il est possible qu'il puisse se ternir ou disparaître au fil du temps. La prise de certains médicaments par son porteur ou la mise en contact du bijou avec l'eau savonneuse peut accélérer ce processus.

SERTISSAGES

Monture / sertissage clos

La pierre est sertie dans une monture entièrement fermée. Il s'agit d'une méthode de sertissage qui enserme la pierre et la maintient en place de manière sûre. C'est une des techniques les plus anciennes, mais elle reste excellente pour protéger à la fois le rondiste (milieu) et la culasse (bas) des éclats et éraflures.

Sertissage à griffe / monture

La pierre est sertie à l'aide de petites griffes. La base est arrondie en forme de perle, les griffes sont recourbées et formées pour maintenir la pierre en place. De nos jours, il s'agit de la méthode la plus commune.

Sertissage en pavé

Une méthode pour sertir les pierres l'une à côté de l'autre afin de créer une surface entièrement recouverte de petites pierres. Cela nous offre une pièce uniforme et scintillante. Le sertissage en pavé est réalisé par des authentiques sertisseurs de diamants.

Galerie / fretwork

La décoration au revers de la monture. Plus le design de la galerie est ouvert plus les pierres recevront la lumière. Les pierres transparentes, comme le Zirconium taillé brillant, ont besoin d'une monture fermée avec une petite ouverture au centre pour laisser passer la lumière.

TI SENTO change les motifs des galeries à chaque nouvelle collection saisonnière.

PIERRES

Cubic Zirconium (CZ)

La plupart des pierres montées sur les bijoux TI SENTO sont en oxyde de zirconium (CZ). Il s'agit de pierres synthétiques faites de matériaux naturels. Le Zirconium est relativement dur, 8 sur l'échelle Mohs (comme référence, pour les diamants c'est 10), et elle a une excellente qualité et transparence. Le CZ (Cubic Zirconia) est disponible en différentes couleurs et peut être taillé en des facettes très aiguës.

Perles avec cristal synthétique

TI SENTO utilise les perles avec cristal synthétique dans ses designs. Les perles avec cristal synthétique combinent la qualité d'une parfaite base de cristal avec la beauté d'une couche en perle, rendant la surface des perles lisses comme de la soie et sans taches. Le poids de ces perles est similaire au poids des perles naturelles ou cultivées et elles s'adaptent à la chaleur du corps, tout comme les vraies perles. De plus, les perles de cristal sont moins susceptibles de changer de couleur et plus résistantes aux éraflures.

Cristal synthétique

Le cristal synthétique est composé de matériaux qui ont les mêmes caractéristiques du cristal. Il est plus doux que le CZ, 6-7 sur l'échelle Mohs. TI SENTO utilise cette pierre très souvent dans ses designs en raison de la grande variété de ses couleurs et de sa dureté.

Double nacre

Cette pierre est composée de deux couches: la base en nacre qui est revêtue d'une autre couche en cristal synthétique.

Pierre veinée

Ce type de pierre a une structure organique dans une couleur qui lui donne un effet de marbre veiné. Chaque pierre taillée est donc unique en son genre.

PRENDRE SOIN DE VOS BIJOUX TI SENTO

Utilisation

Appliquez vos cosmétiques avant de mettre vos bijoux, afin qu'ils ne se détériorent pas au contact de produits tels que le maquillage, le parfum ou encore la laque.

Précautions

- Enlevez vos bijoux avant d'utiliser vos produits de démaquillage et de nettoyage, y compris le savon.
- Évitez le contact avec des surfaces dures.
- Laissez vos bijoux à la maison lorsque vous partez au sport ou à la plage.

Entretien

Utilisez un chiffon de polissage pour bijoux pour nettoyer vos pièces en argent.

Rangement

- Rangez vos bijoux individuellement, dans une boîte ou dans une pochette à bijoux.
- Rangez-les à l'abri de l'humidité.

GARANTIE

Vous trouverez nos conditions de garantie en ligne à l'adresse <https://www.tisento-milano.com/pages/warranty-repair>

INFORMAZIONI SUL PRODOTTO

GIOIELLERIA

Nel corso degli anni TI SENTO ha alzato gli standard nei gioielli d'argento. Offriamo argento della più alta qualità ad un prezzo accettabile; i nostri design sono completi sia come vestibilità che apparenza. Ogni dettaglio è studiato per impreziosire e superare ogni aspettativa. Questo si applica ad ogni pezzo della collezione: dall'attenzione per il dettaglio, all'incastonatura a mano delle pietre e, certamente, alla selezione dei materiali con cui lavoriamo.

Materiali - Argento Sterling (925)

I gioielli TI SENTO sono tutti realizzati in argento Sterling (925). Questo significa che il 92,5% è puro argento e il 7,5% leghe. Più alta è la percentuale di argento, più il prodotto risulterà morbido. Per prevenire danni e rotture, orecchini e chiusure hanno un'aggiunta di acciaio che li rende più forti. Tutti i gioielli a catena sono saldati in ogni punto di connessione. Le chiusure dei braccialetti sono realizzate appositamente per risultare più resistenti nel corso del tempo.

TRATTAMENTI

Platino

Per conferire all'argento un'ulteriore luminosità, ogni gioiello è rifinito con uno strato di platino. Questo trattamento conferisce anche una protezione in più dai graffi e dal naturale scolorimento. Per alcuni pezzi TI SENTO viene usato il rodio nero o il rutenio per esaltarne il design.

Placcatura

Vari elementi della collezione TI SENTO sono placcati in oro giallo o in rosa. Lo strato di oro - 18 carati - ha uno spessore di ben 3 micron. Essendo TI SENTO una linea di gioielli d'argento, la placcatura in oro è dunque usata unicamente per il design e va quindi a rivestire l'argento. Per l'abbinamento con i colori delle pietre e il design complessivo, anche dettagli come montature e griffe possono essere rivestiti in oro. Essendo la placcatura uno strato molto sottile, proprio come il rodio, potrebbe svanire o scomparire nel corso del tempo. L'utilizzo di certi tipi di medicinali o il contatto con l'acqua o il sapone potrebbero accelerare questo processo.

INCASTONATURE

Incastonatura chiusa / a castone

La pietra viene racchiusa dalla montatura. Questo metodo di incastonatura avvolge la pietra e la tiene in posizione in modo sicuro. Si tratta di una delle tecniche più antiche, ma è un metodo eccellente per proteggere sia la cintura (centro) che il padiglione (parte bassa) della pietra da schegge e graffi.

Incastonatura a griffe / rebbio

La pietra viene incastonata con piccole griffe. La base è arrotondata a forma di perla, le griffe sono piegate e modellate mantenendo la pietra in posizione. Oggi questo è il metodo più comune.

Incastonatura a pavé

Un metodo di incastonare le pietre una accanto all'altra in modo da creare una superficie interamente ricoperta da piccole pietruzze. Questo dà vita ad un pezzo uniforme e brillante. L'incastonatura a pavé è realizzata a mano da autentici incastonatori di diamanti.

Galleria / lavoro di intaglio

È la decorazione sul retro del castone.

Maggiore è l'apertura della galleria, maggiore sarà la luce che colpisce le pietre. Le pietre trasparenti, come la Zirconia taglio brillante, hanno bisogno di un'incastonatura chiusa con una piccola apertura al centro per lasciare entrare la luce.

Per ogni nuova collezione stagionale, TI SENTO cambia la fantasia della galleria.

PIETRE

Zirconia Cubica (CZ)

Spesso le pietre incastonate nei gioielli TI SENTO sono zirconia cubica. Questa è una pietra sintetica composta di materiali naturali. La zirconia è una pietra relativamente dura, 8 sulla scala Mohs (10 per i diamanti) e ha una qualità e limpidezza più che eccellenti. La zirconia cubica è disponibile in molti colori e può essere tagliata in faccette estremamente appuntite.

Perle Swarovski®

TI SENTO usa le perle di cristallo Swarovski® nei suoi design. Le perle di cristallo Swarovski®, con la perfetta qualità della base di cristallo e la bellezza del rivestimento perlato, presentano una superficie liscia come seta e priva di intaccature. Il peso delle perle è simile a quello delle perle naturali o coltivate. Le perle di cristallo Swarovski® si adattano alla temperatura corporea proprio come le perle vere. Inoltre sono meno soggette a graffi e cambiamenti di colore.

Cristallo sintetico

Il cristallo sintetico è un materiale con le stesse caratteristiche del cristallo. È più morbido della zirconia cubica e raggiunge il 6-7 sulla scala Mohs. Data la varietà di colori disponibili e la sua durezza, molti design TI SENTO sono realizzati con questa pietra.

Doppietta in madreperla

Questa pietra è composta da 2 strati: la base è costituita da uno strato di madreperla sormontato da un secondo strato di cristallo sintetico.

Pietra venata

Una pietra con un delizioso effetto marmorizzato grazie alla naturale screziatura, sempre diversa, che fa di ogni esemplare un pezzo unico.

PRENDERSI CURA DEI GIOIELLI TI SENTO

Indossali!

Prima applica i cosmetici, poi metti i gioielli: così eviterai possibili danni dovuti al contatto con trucchi, profumi e lacca per capelli.

Trattali con cura!

Togliti i gioielli prima di usare qualunque detergente, incluso il sapone. Evita il contatto con superfici dure. Non indossare i gioielli in spiaggia o facendo sport.

Falli splendere!

Per pulire i tuoi gioielli d'argento, utilizza un panno per la lucidatura dei gioielli

Conservali bene!

Riponi i tuoi gioielli singolarmente in un cofanetto o in un sacchetto per gioielli. Conservali in un ambiente a bassa umidità.

GARANZIA

Le nostre condizioni di garanzia sono disponibili online su <https://www.tisento-milano.com/pages/warranty-repair>

PRODUKTINFORMATIONEN

SCHMUCK

Im Laufe der Jahre hat TI SENTO die Messlatte für Silberschmuck sehr hoch gelegt. Wir bieten Schmuck höchster Qualität zu einem akzeptablen Preis an: Unsere Designs sind in Aussehen und Tragbarkeit vollendet. Jedes Detail ist dazu da, die Erwartungen der Kunden zu verschönern und zu übertreffen. Dies gilt für jeden Artikel und jedes Element in unserer Kollektion: Von unserer Aufmerksamkeit für die kleinen Details, bis zum Handsatz der Steine und natürlich für die Auswahl der Materialien, mit denen wir arbeiten.

Material - Sterlingsilber (925)

Alle TI SENTO Schmuckstücke werden aus Ster-ling Silber (925) hergestellt. Dieses besteht aus 92,5% reinem Silber und 7,5% Legierungen. Je höher der Silberanteil ist, desto weicher wird das Produkt. Um Beschädigungen und Brüche zu vermeiden, werden Ohrschmuck und Schlösser mit einer zusätzlichen Zugabe von etwas Stahl versehen. Alle Teile mit Verbindungsteilen sind an allen Anschlusselementen angelötet. Armband-schlösser sind speziell dazu entworfen, mit der Zeit fest zu bleiben.

BEHANDLUNG

Platin plattiert

Um dem Silber extra Glanz zu verleihen, sind alle Schmuckstücke mit Platin plattiert. Die Platinbeschichtung bietet zudem einen zusätzlichen Schutz vor Kratzern und natürlichen Verfärbungen. Für einige Schmuckstücke verwendet TI SENTO schwarz gefärbtes Rhodium oder Ruthenium, um das Design zu unterstreichen.

Vergoldung

Einige Artikel in der Kollektion sind mit Gelbgold oder Roségold veredelt. Die - 18 Karat - Goldschicht ist 3 Mikron dick. Da es sich bei TI SENTO um eine Silberschmucklinie handelt, wird Goldplattierung als Designelement verwendet und die Beschichtung auf das Silber aufgetragen. Um die Farben von Steinen zu unterstreichen oder das Gesamtdesign zu ergänzen, können Details wie Fassungen und Zinken ebenfalls vergoldet werden. Da der Überzug eine dünne Schicht ist, kann sie genau wie Rhodium mit der Zeit verblassen oder verschwinden. Die Verwendung bestimmter Medikamente durch den Träger oder der Kontakt des Schmucks mit Wasser und Seife kann diesen Vorgang beschleunigen.

FASSUNGEN

Lünette / Zargenfassung / geschlossene Fassung

Der Stein befindet sich in einer komplett geschlossenen Hülle. Das ist eine Setzmethode, die den Stein umfasst und ihn sicher an seinem Platz hält. Es ist eine der ältesten Techniken und bleibt eine ausgezeichnete Methode, um den Gürtel (Mitte) und den Pavillon (unten) eines Steins vor Splittern und Kratzern zu schützen.

Krallen- / Zinkenfassung / Chatonfassung

Der Stein ist mit kleinen Krallen besetzt. Abgerundet in Form einer Perle halten die gebogenen und geformten Krallen den Stein fest. Das ist die häufigste Methode, die zum Beispiel bei Solitär-Verlobungsringen verwendet wird.

Pavé Fassung

Bei dieser Methode werden Steine nebeneinander gesetzt, so dass eine ganze Oberfläche von kleinen Steinen bedeckt wird. So entsteht ein gleichmäßiges und funkelndes Stück. Die Pavé Fassung setzen Diamantsetzer per Hand.

Galerie

Die Dekoration auf der Rückseite des Gehäuses. Je offener die Galerie ist, desto mehr Licht fällt auf die Steine. Transparente Steine wie Zirkonia im Brillantschliff benötigen jedoch ein geschlossenes Gehäuse mit einer kleinen Öffnung in der Mitte, um das Licht durchzulassen.

TI SENTO verändert die Galerie für jede saisonale Kollektion.

STEINE

Cubic Zirconium (CZ)

Die bei TI SENTO Schmuck verwendeten Steine sind oftmals Zirkonia, ein synthetischer Stein aus Naturmaterial. Zirkonia ist relativ hart, auf der Mohs-Skala eine 8 (Diamanten haben den höch-sten Wert mit 10), hat eine dreifache A-Qualität und Klarheit. Zirkonia ist in vielen Farben erhält-lich und kann in extrem scharfen Facetten ges-chliffen werden.

Kristallperlen mit Perlenmantel

TI SENTO verwendet Kristallperlen mit Perlenmantel in den Designs. Kristallperlen mit Perlenmantel verbinden die Qualität eines perfekten Kristallkerns und der Schönheit einer Perlenbeschichtung, die den Perlen eine makellose, seidig glatte Oberfläche verleiht. Das Gewicht dieser Perlen ist Natur- oder Zuchtperlen sehr ähnlich, und durch die sinnliche Wahrnehmung passen sich diese Perlen wie echte Perlen der Hauttemperatur an. Darüber hinaus sind die Kristallperlen weniger anfällig für Kratzer und Farbveränderungen.

Synthetische Kristalle

Das Material von synthetischen Kristallen weist die gleichen Eigenschaften wie Kristalle auf. Sie sind weicher als Zirkonium, 6-7 auf der Mohs-Skala. Wegen der verfügbaren Farbvielfalt und seiner Härte werden viele TI SENTO Designs mit diesem Stein gemacht.

Perlmutter Dublett

Dieser Stein besteht aus zwei Schichten: Die Basis besteht aus einer Perlenschicht, die mit einer zweiten Schicht aus synthetischem Kristall über-zogen ist.

Gemaserter Stein

Diese Art von Stein hat eine organische Struktur in verschiedenen Farben, die ihm ein gemasertes Marmorbild verleiht. Jeder geschlif-fene Stein ist daher in seinem Muster einzigartig.

PFLEGE DEINEN TI SENTO SCHMUCK

Trage ihn

Trage zuerst deine Kosmetik auf und zuletzt den Schmuck, um Schäden von Make-Up, Parfum und Haarspray zu vermeiden.

Pflege ihn

- Nimm deinen Schmuck ab wenn du Reinigungsprodukte und Seifen verwendest.
- Vermeide Berührungen mit harten Oberflächen.
- Lass deinen Schmuck zuhause wenn du zum Sport oder an den Strand gehst.

Reinige ihn

Verwenden Sie ein Schmuckpoliertuch um Ihren Silberschmuck zu säubern.

Bewahre ihn auf

- Gib den Schmuck einzeln in eine Box oder einen Schmuckbeutel.
- Platziere ihn an einem Ort mit wenig Luftfeuchtigkeit.

GARANTIE

Unsere Garantiebedingungen finden Sie online unter <https://www.tisento-milano.com/pages/warranty-repair>

INFORMAÇÃO SOBRE O PRODUTO

JOIA

Ao longo dos anos a TI SENTO elevou o nível da joalheria em Prata. Oferecemos a mais alta qualidade de joalheria, a um preço acessível. O nosso design destaca-se pela sua versatilidade. Todos os detalhes são importantes para embelezar cada joia e captar a atenção do consumidor. Isso reflete-se em todos os elementos e artigos da nossa coleção, desde os mais pequenos detalhes até ao modo artesanal como trabalhamos as pedras - e, claro, à seleção dos materiais com os quais trabalhamos.

Material: Prata de Lei 925

Toda a joalheria da TI SENTO é feita de Prata de Lei 925. Isto significa que 92,5% é Prata pura e 7,5% são fusões de metais. Quanto maior a percentagem de Prata, mais macio é o produto final. De modo a evitar danos e defeitos, as joias e fechos têm um banho de aço adicional. Todas as peças desenhadas como elementos de ligação são soldadas. Os fechos das pulseiras são especialmente desenhados para se manterem sólidos à medida que o tempo passa.

TRATAMENTO

Banho de platina

Para dar à Prata um brilho adicional, todas as joias são banhadas a platina. Além disso, o banho de platina confere uma proteção extra contra os riscos e a descoloração natural. Em algumas joias a TI SENTO utiliza o banho de ródio preto para realçar o design de peças específicas.

Banho de Ouro

Várias peças da coleção têm banho de ouro amarelo ou de ouro rosa. A camada de ouro de 18 quilates tem 3 microns de espessura. A TI SENTO continua a afirmar-se como uma linha de joalheria em Prata e, nesse sentido, o banho de ouro é utilizado como um elemento de design. Para complementar as cores das pedras e a conceção global da joia em si, alguns detalhes podem ser banhados a ouro.

Tal como pode acontecer com o banho de ródio, também o banho de ouro pode escurecer ou desaparecer ao longo do tempo. Não é aconselhável pôr as joias em contacto com elementos corrosivos ou abrasivos, já que estes poderão acelerar o processo de oxidação.

CARACTERÍSTICAS

Bizel/Encaixe

A pedra apresenta-se completamente inserida na estrutura do anel. Com método, a pedra é como que abraçada de forma a dar-lhe estabilidade e, não correndo o risco de cair. Esta é uma das técnicas mais antigas e mais valorizadas atualmente. Protege a pedra na íntegra, impedindo que esta se risque ou parta.

Ajuste da garra

A pedra fica presa em pontos específicos. As garras que abraçam a pedra são arredondadas nas pontas, segurando-a, sem a danificar. Este é o método mais utilizado para pedras solitárias.

Cravar em pavé

Um método que permite fixar as pedras próximas umas das outras, de modo a que toda a superfície fique coberta por pequenas pedras. O resultado final é uma peça uniforme e brilhante. Esta técnica é muito usada nos anéis cravejados com diamantes, por exemplo.

Galeria

O trabalho na parte de trás da peça e o padrão, muda mediante as diferentes coleções. A mais valia é sem dúvida a luz refletida nas pedras. Pedras transparentes (zircões com corte brilhante) precisam de uma caixa mais fechada, mas com uma pequena abertura no meio para deixar a luz entrar.

A TI SENTO muda os padrões da sua galeria, a cada nova coleção.

PEDRAS

Zircões cúbicos (CZ)

A maioria das pedras TI SENTO são zircões: pedras sintéticas feitas de matéria natural. É uma pedra relativamente dura, 8 na escala de Mohs (o diamante tem 10 nesta mesma escala), triplo A de qualidade e claridade. Está disponível em múltiplas cores e pode ser cortada em formas extremamente afiadas.

Pérola sintética com cristal

A TI SENTO usa pérola sintética com cristal nos seus designs; pérolas que combinam a qualidade de um cristal perfeito à beleza e acabamento da pérola, conferindo-lhe uma superfície lisa e sedosa. O peso destas pérolas é semelhante à das pérolas naturais ou cultivadas e a perceção sensorial faz com que estas se adaptem ao calor da pele como se fossem pérolas verdadeiras. Além disso, as pérolas de cristal são menos propensas a arranhar ou a mudar de cor.

Cristal sintético

O cristal sintético é feito com as mesmas características do cristal, sendo que é mais macio do que a zircão - 6-7 na escala de Mohs. A TI SENTO opta por trabalhar este cristal devido à sua variedade de cores e resistência.

Madrepérola

Esta pedra é composta por duas camadas. A base é constituída por uma camada de pérolas, coberta depois por uma segunda, de cristal sintético.

Pedra com veios

Este tipo de pedra tem uma estrutura orgânica e uma aparência que faz recordar o mármore. Logo, cada pedra cortada possui um padrão único.

COMO CUIDAR DAS SUAS JÓIAS TI SENTO

Use-as!

Opte por colocar as suas joias no fim. Desta forma, os danos causados por cosméticos e perfumes são menores. .

Cuide delas!

Tire as suas joias, quando usar produtos de limpeza (sabonetes incluídos) Evite o contato com superfícies duras. Em dias de praia, é melhor deixar as joias em casa.

Limpe-as bem!

Utilize um pano próprio para polir jóias ao limpar os seus artigos em Prata.

Guarde-as ainda melhor!

Guarde as suas jóias individualmente numa caixa ou bolsa própria. Mantenha-as numa zona com pouca humidade.

GARANTIA

INFORMACIÓN DEL PRODUCTO

JOYAS

Con los años, TI SENTO ha elevado los estándares de la joyería de plata. Ofrecemos joyas de la más alta calidad a un precio asequible: nuestros diseños son completos y cómodos de llevar. Cada detalle está ahí para embellecer y exceder las expectativas del cliente. Esto se aplica a cada pieza y a cada elemento de nuestra colección, desde la atención a los pequeños detalles, hasta al trabajo artesanal de las piedras y, por supuesto, a la selección de los materiales con los que trabajamos.

Material - Plata de Ley (925)

Todas las joyas de TI SENTO están hechas con Plata de Ley (925). Esto significa que el 92.5% es plata pura y el 7.5% son aleaciones, es decir, fusiones de distintos metales. Cuanto mayor sea el porcentaje de plata, más suave será el producto. Con el fin de evitar daños y roturas, los pendientes y los cierres reciben un revestimiento de acero adicional. Todas las piezas diseñadas con elementos conectados entre sí, están soldadas en cada punto de unión. Y los cierres de las pulseras están especialmente diseñados para ser resistentes durante mucho tiempo.

TRATAMIENTO

Bañada en platino

Todas nuestras joyas están bañadas en platino para dar a la plata un brillo adicional. El chapado en platino también proporciona una protección adicional contra el rayado y la decoloración natural. En algunas joyas, TI SENTO usa rodio de color negro o rutenio para realzar el diseño.

Revestimiento de oro

Varios artículos de la colección están bañados en oro amarillo o rosa. La capa de oro de 18 quilates tiene un grosor de 3 micras. TI SENTO es una línea de joyería de plata, por lo que el chapado en oro se utiliza solamente como elemento de diseño como, por ejemplo, para complementar los colores de las piedras, el diseño general o los detalles, como los ajustes y los ganchos.

Como el chapado es una capa fina, al igual que el rodio, éste puede ir desapareciendo a lo largo del tiempo. El uso de ciertos medicamentos por parte del usuario o el contacto de las joyas con agua y jabón puede acelerar este proceso.

AJUSTES / ESTRUCTURAS

Bisel / configuración cerrada

La piedra se coloca en una estructura cerrada. Este método abarca la piedra en su totalidad y la mantiene fija en su sitio. Es una de las técnicas más antiguas y sigue siendo un método excelente para proteger la piedra, evitando su caída y los arañazos.

Incrustación en garras / dientes

La piedra se encaja entre pequeñas garras. Estas garras tienen las puntas redondeadas y están ligeramente dobladas, sosteniendo la piedra en su lugar. Este es el método más utilizado, por ejemplo, en anillos de compromiso de una sola piedra.

Ajuste Pavé

Este método consiste en cubrir toda una superficie con pequeñas piedras, colocándolas una al lado de la otra. El resultado final es una pieza uniforme y brillante. El ajuste pavé está hecho a mano por especialistas en la colocación de diamantes.

Galería / tallado

Es la decoración en el reverso de las piezas. Cuanto más abierto sea el diseño de la galería, más luz reflejará en las piedras. Las piedras transparentes, como la zirconia blanca, necesitan un diseño más cerrado con una pequeña abertura en el medio para dejar pasar la luz.

TI SENTO cambia los patrones de las galerías para cada nueva colección.

PIEDRAS

Zirconia cúbica (CZ)

En muchos casos, las piedras utilizadas para las joyas de TI SENTO son zirconia; una piedra sintética compuesta de materiales naturales. La zirconia es relativamente dura, 8 en la escala de Mohs (10 para los diamantes) y tiene una calidad y claridad más que excelentes. La zirconia cúbica está disponible en muchos colores y puede cortarse en facetas extremadamente definidas.

Perlas de cristal

TI SENTO usa Perlas de cristal en sus diseños. Estas perlas combinan la calidad de un núcleo de cristal perfecto con la belleza de un recubrimiento de perla, consiguiendo un efecto liso, sedoso y sin defectos. El peso de estas perlas es similar al de las perlas naturales o cultivadas y se adaptan a la temperatura corporal, al igual que las perlas reales. Además, las perlas de cristal son menos propensas a arañazos y cambios de color.

Cristal sintético

El cristal sintético está hecho de un material con las mismas características que el cristal. Es más suave que la zirconia cúbica y alcanza 6-7 en la escala de Mohs. Muchos diseños de TI SENTO están hechos con este tipo de piedra, debido a la variedad de colores disponibles y a su resistencia.

Doble Madreperla

Esta piedra está compuesta por dos capas: la base consiste en una capa de perlas, cubierta por una segunda capa de cristal sintético.

Piedra veteadada

Este tipo de piedra tiene una estructura orgánica de un color específico que le da un aspecto de mármol veteadado. Por lo tanto, cada piedra es única.

CUIDADOS A TENER

Aquí compartimos los consejos de nuestro equipo de diseño sobre cómo cuidar la joyas de TI SENTO.

¡Pónsela!

Póngase primero los cosméticos y por último las joyas. Así evitarán dañarse con productos como el maquillaje, el perfume y la laca para el cabello.

¡Cuídela!

- Quítete las joyas cuando use productos de limpieza, jabones incluidos.
- Evite el contacto con superficies duras.
- Deje sus joyas en casa cuando haga deporte o vaya a la playa.

¡Límpiala!

Usa un paño de pulir para limpiar tus piezas de plata.

¡Guárdela!

- Guarde sus joyas individualmente en una caja o bolsa de joyería.
- Colóquelas en un área con poca humedad.

COLOURS

REFERENCES

All TISENTO products are numbered. The first number of the reference describes the product group.
For example: 1xxx is a ring as it starts with a 1.

- | | |
|-----------------------------|----------------|
| 1 = rings | 6 = pendants |
| 2 = bracelets | 7 = earrings |
| 3 = necklaces | 9 = ear charms |
| 4 = clip rings or gift sets | |

COLOURS

All TISENTO products are colour coded. The last two letters of the references describe the used colour.
For example: xxxzI is an item with Zirconia white.

 BB Baby Bubble	 TE Tiger Eye
 BG Blue green	 TC Translucent crystal
 BL Blue lapis	 TQ Turquoise
 BO Black Onyx	 TT Translucent Taupe - NEW
 CO Coral Orange	 TU Turtle
 CP Coral Pink	 WM Milky white
 CR Coral red	 YS Yellow plated silver
 DB Dark blue	 ZI Zirconia white
 EM Emerald	 ZR Zirconia white with rose gold plating
 GB Translucent grey blue	 ZY Zirconia white with yellow gold plating
 LY Leopard yellow	 TY Turquoise yellow plating
 MA Malachite	 YP Yellow plated with pearl
 MW Mother of pearl white	 FU Fuchsia
 NU Nude	 BY Translucent deep dark blue
 NY Neon - NEW	
 OR Orange - NEW	
 PW Pearl white	
 RS Rose gold	
 SB Silver bubble	
 SI Plain silver	
 SR Plain silver combined with rose gold plating	
 ST Silver twisted	
 SY Plain silver combined with yellow gold plating	

SIZING GUIDE

RINGS SIZES

BRACELET SIZES

Our TI SENTO silver bracelets come in sizes S, M, and L. Below are the measurements for each bracelet type:

Bangle bracelets
S (44x54mm/ 1.7x2.1in), M (50x60mm/1.9x2.3in), L (55x65mm/ 2.1x2.5in)

Stretchy bead bracelets
S (15.2cm/6in), M (16.5cm/6.5in), L (19.1cm/7.5in)

Bead bracelets (with lock), chain bracelets, charm bracelets
come with an extension chain with size options:
S (16cm/6.3in), M (18cm/7in), L (20cm/7.9in)

Satin bracelets
Satin bracelets come in one size only.
Their size is adjustable ranging from 14.5-25cm (5.7-9.8in).

NECKLACE SIZES

Necklace length fit overview

Necklaces with extension chain

BRACELET SIZE ADVICE

OUR ADVICE FOR YOUR WRIST SIZE

Wrist size	Advice
Below 14.0cm / 5.5in	= S will be loose
14.0cm - 15.4cm / 5.5in - 6.1in	= S
15.5cm / 6.1in	= S or M (S for a tighter fit M for a looser fit)
15.6cm - 17.4cm / 6.1in - 6.9in	= M
17.5cm / 6.9in	= M of L (M for a tighter fit) L for a looser fit
17.6cm - 19.5cm / 6.9in - 7.7in	= L
Above 19.5cm / 7.7 in	= L will be tight

Everyone has a different personal preference for how tight or loose they want a bracelet to fit their wrist. The above combination of wrist size and bracelet size should therefore be seen as an indication, not a rigid rule.

TSM BUSINESS

EN - TSM BUSINESS

Through our platform we offer all standard and extended services, such as 24/7 access to our ordering system, brand & product information and a media gallery. TSM Business offers the following features:

- Media Room for (marketing) downloads
- Improved overview of your account
- Account statistics available during ordering
- Improved order checkout
- Ordering amount with discount prices
- Improved order import (.xls, .xlsx, copy/paste)
- Real-time stock availability and expected delivery data
- Drop shipment and urgent deliveries (not available in all countries)
- Online payment (not available in all countries)
- Manage your own TI SENTO - Milano website Dealer Locator registration

MEET TI SENTO:

MODERN CLASSIC JEWELLERY

[Modern] - adjective
relating to, or characteristic of the present

[Classic] - noun
a work of art of recognized and established value

TI SENTO always draws inspiration from classic items, but it's power lays in making the classic items modern. The modern classic style is intertwined in our entire branding. Our base is always classic, but we give everything we do a modern touch.

@TISENTOMILANO #MODERNCLASSICS
