

## **Redline 360c (International) Firmware v1.7/ v1.4 Release Notes**

### **What's New in Firmware v1.7/ v1.4**

Cedar Electronics is happy to announce the release of version 1.7 and version 1.4 firmware for the Redline 360c (International). Versions differ for newer models available in 2023 (microprocessor change - no performance change). We have developed several improvements in this release which should continue to improve your experience with the Redline 360c (International). These improvements are currently only available for the international models only.

### **Enhancements:**

- Minor DSP Improvements
- New gun detection added: Dahua
- Bluetooth speaker and headset volume control through Drive Smarter App
- Laser Gun ID added for ZR5/ ZW5

### **How to Get the Update**

Downloads are available directly to your Redline 360c (International) through Wi-Fi or through Detector Tools Pro. If you are taking advantage of the Wi-Fi connection in your vehicle or have access to Wi-Fi, you will be prompted for the update once it becomes available.

Manual downloads using a USB connection with your PC or Mac are available if you are unable to utilize the WiFi to update your device by going to Detector Tools Pro on the EscortRadar.com website. If you have any questions, please contact our global customer care team at [globalsupport@escortradar.com](mailto:globalsupport@escortradar.com).

### **Keep the Feedback Coming**

We want to keep hearing from you! If you have feedback or suggestions on how to make the Redline 360c even better, send an email to [radarfeedback@cedarelectronics.com](mailto:radarfeedback@cedarelectronics.com).
