

## **Redline Ci (International) Firmware v1.4 Release Notes**

### **What's New in Firmware v1.4 (International)**

Cedar Electronics is happy to announce the release of version 1.4 firmware for the Redline Ci (International). We have developed several improvements in this release which should continue to improve your experience with the Redline Ci (International). These improvements are currently only available for the international models only.

#### **Enhancements:**

- Minor DSP Improvements
- New gun detection added: Dahua
- Bluetooth speaker and headset volume control through Drive Smarter App
- Laser Gun ID added if using laser shifters with your unit

#### **How to Get the Update**

Downloads are available directly to your Redline Ci (International) through Wi-Fi or through Detector Tools Pro. If you are taking advantage of the Wi-Fi connection in your vehicle or have access to Wi-Fi, you will be prompted for the update once it becomes available.

Manual downloads are available using a USB connection if you are unable to utilize the WiFi update directly with your device. For this option, we recommend having your dealer complete the firmware update. If you have any questions, please contact our customer care team at 855-339-3311.

#### **Keep the Feedback Coming**

We want to keep hearing from you! If you have feedback or suggestions on how to make the Redline 360c even better, send an email to [radarfeedback@cedarelectronics.com](mailto:radarfeedback@cedarelectronics.com).
