

## BUNK BED ASSEMBLY INSTRUCTIONS

### PACKAGE INCLUDES:

- A - 2 x End panels (one includes ladder)
- B - 4 x Side rails (2 packages)
- C - 2 x Safety rails (1 package)
- D - 2 x Bed slats
- E - 1 x Package of bolts & parts
- \*Mattress not included

### TOOLS NEEDED:

Phillips Head Screwdriver

Allen Key (included)

Two people needed to assemble

### INSTRUCTIONS:

1. Unpack all components. Carefully unwrap the parts and avoid accidentally damaging/stabbing the timber while using scissors. \*Note: bolts & parts are in a small package wrapped in orange "fragile" tape.
2. Place the bedhead and foot of the bunk (A) in a vertical position (leaning against wall if possible).
3. Start with the side rails (B). Important: rails should be installed so that when slats are put on top, the slats are inset towards the bottom of the rail and the mattress is recessed approximately 100mm.
4. Position the side rail against the metal plate on the top and screw two bolts at each end. Then install the other side rail on the top - do not tighten.
5. Repeat instructions for the two bottom side rails (B). \*Remember to place right way up.
6. Install the safety rails (C) using the allen key bolts. Tighten, but don't over tighten till the end.
7. Once all side rails & safety rails have been installed - tighten and secure all screws in place.
8. Place slats (D) on top of side rails.

**IMPORTANT:** periodically check that all screws and bolts are tight and secure.
