DINING TABLE

STYLE & SEATING GUIDE

Our Style & Seating Guide was created with the intention to assist you determine the number of chairs that can be placed comfortably around a table. It's important to note that when purchasing a dining table, not only should you consider the table's dimensions but also its style and the width of the chairs.

Round

TABLE STYLES

Round tables encourage closer interaction and work well in smaller rooms to make them look more generous in size. In general, round tables with one pedestal base running down the centre accomodate more seats than other designs because there are no legs obstructing seating space.

1800D
8-10 people

Rectangular

TABLE STYLES

Rectangular tables suit most spaces, but work particularly well in long or narrow dining rooms. Ideal for families or entertaining, we also suggest considering extension tables for additional seating - extensions generally add space for two additional seats. For the best use of space, we recommend using chairs along the sides and armchairs at the ends..

2100L - 2400L
8-10 people

2800L
10-12 people

Square

TABLE STYLES

Square shaped rooms look best with square dining tables. The design allows for closer and more direct interaction - creating a more intimate feel and encouraging conversation. Also suitable for large open spaces that are used as both dining and living rooms, square tables can help divide the areas without looking too busy.
