SRC
rehab™

Back Panel (DL)

Wound support from any lower back surgical procedures

Abdominal Panel (DL)

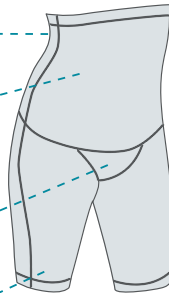

Abdominal wound support post surgery (appendectomy, cholecystectomy, gastrectomy, hernioplasty, laparotomy, etc)

Gusset Panel (DL)

Supports the perineum following any gynaecological procedures

Leg Panel

Encourages good venous return

SRC
restore™

Waist

Soft, narrow and non-restrictive elastic

Back Panel (DL)

Support to the lumbo-sacral area

Abdominal Panel (DL)

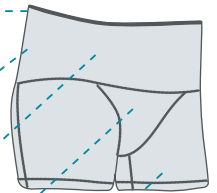

Support from the umbilicus to pubic bone

Gusset Panel (TL)

Even compression to the entire perineal area

Leg Panel

Easy to wear under shorts or dresses and anti-chaffing

Double Layer (DL) and Triple Layer (TL) panels provide true cross compression so that during activity no compression is lost at any time, delivering increased circulation and support
