## SRC recovery

## $Post \, Pregnancy \, Support \, Garments \, Landscape$

Features	Benefits	SRC Recovery Shorts	Tummy Wraps	Elasticised Bandages / Tubing	Shapewear
	Compression Level	Low	Varied DIY	Low	Medium to High
Gentle medical grade compression	Avoids muscle deactivation and allows for SRC Recovery garments to be worn day and night, delivering 24 hour wearability and pain relief.	✓	X	X	X
Anatomical Support Panels	Anatomically targeted panels deliver compression to address multiple conditions such as Perineal wounds, C-Section, DRAM.	✓	X	X	X
Customised fabric design	Quality and longevity of the fabric means that it has superior ability to stretch and recover after wearing and washing.	✓	X	X	√x
True Cross Compression	Multi-layered support panels provide consistent and anatomically targeted compression during movement.	✓	X	X	X
Special wicking fabric	Breathable, comfortable and dry. Moisture wicking fabric eliminates odour.	✓	X	X	√x
Flatlock seams	Increased comfort and no aggravation to wounds.	✓	X	X	√X
No need for adjustable buttons, velcro, zips & clips	More convenient and comfortable, there is no need to regularly adjust while wearing the garment.	✓	X	X	✓X
Patented product design	Purposely designed for the needs of women post delivery.	✓	√x	X	X
Long lasting resilient high quality garment	Same great benefits for recovery after subsequent pregnancies. Can be used ongoing for exercise and aesthetic reasons under fitted clothing.	✓	<b>√</b> X	X	X
Multi-purpose garment	Ideal for exercise, work and everyday wear.	✓	X	X	X
Application		True Multi-function	Great for addressing specific issues as diagnosed and recommended by your healthcare professional		Great for aesthetic purposes for short periods

ARTG listed - 188014 Patented Product

\* This product is TGA listed

As a specialist obstetrician
I have had so much positive
feedback that I became a
stockist for SRC products,
and now include a pair of the
recovery shorts in my Obstetric
Package.
