Instructions:

Step 1: Use a hole saw to cut into the middle of your mount.

Step 2: Install your head unit into the mount.

Step 3: Drill a hole into the dash or remove and relocate the auxiliary power outlet to run the head unit wire to the bus bar.

Step 4: Remove brake reservoir bay cover.

Step 5: Line up the plastic bracket (provided in kit) with the factory dimples on the dash. (Reference Picture 1)

Step 6: Screw the bracket into place.

Step 7: Place upper mount with head unit installed over the plastic bracket and use provided hardware to screw the mount into place. (Reference Picture 2)

Step 8: Use the last two screws to mount the back of the upper mount through the two dimples. (Reference Picture 3)
