## The Setup

1. Remove the 2 base pieces, 5 stakes, and 10 rings from the carry bag
2. Assemble the target and stand 12 feet from the target before beginning your game.

## The Rules

### Basic Rules

The objective of the ring toss is to score more points than the opponent by throwing the rings around the stakes and being awarded points for each ringer. The middle stake is typically worth the most.

Before the game players should agree to play cancellation scoring or tally scoring. Cancellation scoring is when the points of one player cancel out the points of their opponents. Tally scoring is when the points awarded to each player are tallied up every round and added to their game total.

### Horse

The objective of H-O-R-S-E is for players to make ringers. The player who makes a ringer that the opponent does not duplicate, wins that round and a letter is awarded to the player that did not make the shot. The game is won when an opposing player is awarded all the letters.

### Five Stake Scoring:

Player's race to a predetermined number of points by making ringers and being awarded the points that are associated with each stake. The first person to the predetermined final score wins the game.

## Care and Maintenance

### Keep it Clean

Use a damp cloth to wipe off dust and dirt after every use. If it is a bigger job that requires something more heavy duty, use warm, soapy water. Cleaning your playing board will keep it from deteriorating over time.

### Update the Coat

Our games come pre-coated with a high-grade polyurethane that protects not only the aesthetic of the wood but also, it's integrity. Different climates and weather can change the length of the protection you get from our original process, so if you start to see some wear you should simply add another layer of polyurethane to extend the life of your game.

### Mind The Elements

Hail, rain, snow, mud, and heat can damage your game. Protect your game from extreme weather and do not play in harsh conditions.
